

Lawn Conversion Rebate Program

Effective June 1, 2015 through June 30, 2016

❖ CHECK LIST FOR REBATE APPLICANT'S USE ONLY

- I have a good standing water account with City of Hayward.
- I am converting a minimum of 300 square feet of lawn, or entire lawn.
- My existing lawn is in healthy condition.
- My Plant list is listed as low water requiring plants: The City of Hayward Suggested Water-Efficient Plants, or EBMUD Summer-Dry Climates, or Sunset Western Garden Book, or otherwise demonstrated to be low-water use.
- I submitted my Application and scheduled a Pre-Conversion Inspection.
- I received a Notice of Proceed.
- I removed or capped the existing sprinkler irrigation system in the Converted Area or converted it to a drip irrigation system.
- I installed low water requiring plants in at least 50 % of the Converted Area and the rest of the Converted Area with permeable paving such as mulch, pavers and stones in sand bed.
- I installed a 3-inch layer of mulch (except for shredded bark mulch) in the planting area within the Converted Area.
- The Converted Area doesn't include high-water use plants, artificial turf, non-biodegradable weed-block material, overhead sprinkler systems, exposed soil surfaces, or non-permeable paving.
- I completed my Lawn Conversion Project within 4 months from receiving the Notice to Proceed.
- I have receipts for the plants and landscape material.
- I scheduled and passed a Post-Conversion Inspection.
