Subject: Proposed Residential Development – Filipino Church Property
25906 Gading Road
Hayward, California
**PHASE I AND PHASE II ENVIRONMENTAL SITE
ASSESSMENTS**

Dear Mr. Dutra:

At your request, *GeoSolve, Inc.* has conducted a Phase I and Phase II Environmental Site Assessments for the above referenced site. The following is a copy of the report, which presents the results of our assessment according to ASTM E1527-2013 standard and surficial soil laboratory analyses.

Should you have any questions relating to the contents of this report or require any additional information, please contact our office at your convenience.

Sincerely,
GeoSolve, Inc.

Robert D. Campbell, M.S., P.G., C.E.G., Q.S.D.
Principal Engineering Geologist

Copies: 1 to Dutra Enterprises, Inc.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

1.0 INTRODUCTION

1.1 Objective

The purpose of conducting this Phase I Environmental Site Assessment (ESA) is to evaluate the property for contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) 42 U.S.C. §9601 and petroleum products, also known as Recognized Environmental Concerns (RECs). As such, this Phase I ESA is intended to permit a user to satisfy one of the requirements to quality for the innocent landowner, continuous landowner, or bona fide prospective purchaser limitations on CERCLA liability or known as “landowner liability protections” through conducting All Appropriate Inquiries (AAI) into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B). *GeoSolve, Inc.* has conducted detailed assessment of the past use of the property, historical research, site visit, file reviews and/or file searches and interviews with the site managers/property owners as summarized in this Phase I ESA, which complies with ASTM E1527-2013 for real for secondary potential contaminated sites within a 1-mile radius of the property.

The entire property consists of 1.74-acre rectangular parcel, which is currently vacant and is occupied by one water well and a former foundation at 25906 Gading Road in Hayward, California with an Assessor’s Parcel Number (APN) 453-005-63-2.

This Phase I Environmental Site Assessment was prepared for the use of our client, Dutra Enterprises, Inc., who can rely on this report for evaluating the environmental conditions of the property and Dutra Enterprises, Inc. can rely on this report until February 18, 2016.

1.2 Scope

GeoSolve, Inc. was authorized by Mr. Tony Dutra of Dutra Enterprises, Inc. on August 11, 2015 to perform the following:

- a) Perform a field reconnaissance of the subject property for significant surficial signs of hazardous waste release, storage of hazardous materials, and surficial indications for the presence of USTs, and water wells;

- b) Off-site research into past land use of the property involving, as applicable, telephone and personal interviews with government personnel and the review of historical documents;
- c) A review of available aerial photographs for obvious surficial features indicative of past land use with attention to indicators of hazardous materials or waste use, disposal, or storage;
- d) An interview with the current property owner(s);
- e) A review of fuel leak and chemical release lists and files for soil and groundwater contamination cases within a 1-mile radius from the subject property as made available through the appropriate Federal and State and local regulatory agencies, if available;
- f) Documentation of the site with photographs; and
- g) Preparation of this report.

2.0 SITE LOCATION AND DESCRIPTION

2.1 Location

The subject property is situated within the East Bay portion of the greater San Francisco Bay region within Alameda County. The site is located at 25906 Gading Road in the City of Hayward, California, and consists of one parcel totaling approximately 1.74-acres with APN 453-005-63-2. The property is occupied by a concrete slab near Gading Road and an older inactive groundwater well in the back of the property. No structures are situated on the property. The subject property is bounded by residential developments to the north, east, and south and Gading Road to the west. The location of the site is shown on Figure 1, Site Vicinity Map and Figure 2, Site Plan.

2.2 Topography and Drainage

The local topography slopes gradually to the northeast. The subject site is relatively flat at approximately 40 feet above mean sea level (msl), and gently slopes toward the south. Ward Creek is situated approximately 1,000-feet east of the site, and flows south and southwest into the San Francisco Bay. Drainage of the property appears to be to the west-southwest along topography.

2.3 Geology/Hydrogeology

The materials underlying the site are mapped as Late Pleistocene alluvium (Qpa) by Helley and Lajoie (1979), which consist of weakly consolidated, slightly weathered, poorly sorted, irregular interbedded clay, silt, sand and gravel units. The Late Pleistocene alluvium contains local accumulations of fresh water gastropods and pelecypods and continental vertebrate fauna, including camel, bison, horse, sloth, and mammoth fossils. The Late Pleistocene alluvium has a maximum thickness of 150 feet and ranges in age from 35,000 to 70,000 years old, which was deposited from flowing water in stream channels, on stream terraces, and on alluvial fans. The Late Pleistocene Alluvium is underlain by alternating layers of older alluvial deposits to approximately 2 to 3 kilometers (km). The older alluvial deposits are underlain by Cenozoic marine bedrock units.

The active trace of the Hayward Fault is situated approximately 0.94-mile east-northeast of the site and the Hayward Fault is considered active by the Alquist-Priolo Earthquake Fault Zoning Act (AP-Zone) of 1994, and is listed as a strike-slip fault with right-lateral movement (<http://gmw.consrv.ca.gov/shmp/download/ap/pdf/HAYWARD.PDF>). Furthermore, the subject site is situated within a mapped zone for liquefaction during a moderate to violent earthquake event.

Based on information obtained from the California Regional Water Quality Control Board's Geotracker website (http://geotracker.waterboards.ca.gov/regulators/deliverable_documents/2500658929/360%20W%20Harder%20Rd%20-%20GMR%2009%2011%20%282%29.pdf) depth to groundwater beneath the City of Hayward Fire Station #2 located at 360 West Harder Road in Hayward, California, ranged from 13 feet to 21 feet below ground surface (bgs) and flowed toward the south at 0.006 foot per foot (ft/ft).

2.4 Site Visit

A *GeoSolve, Inc.* field geologist visited the site on Tuesday, August 18, 2015, and made the following observations:

- The subject property consists of one continuous rectangular-shaped totaling approximately 1.74-acres, which was located at 25906 Gading Road in Hayward, California. The property was vacant during our site visit; however, a concrete slab and asphalt was present along the western portion of the property. An abandoned groundwater-supply well was situated on the eastern portion of the property. Remnants of orchards were observed on the property.

Although not observed, a septic tank is anticipated to be present on the western portion of the property. The property is bounded by Gading Road to the west and residential developments to the north, east and south of the site. Digital photos of the site are shown on Photos 1A through 4B.

- Based on the remnant fruit trees observed on the property and organochloride pesticide residues maybe in the surficial soil. Due to the presence of a concrete slab (former residence) suspected lead-based paint (LBP) maybe present in the soil around the residence.
- No visual evidence for the presence of USTs was ascertained from our site visit. No suspected hazardous substances/hazardous wastes were observed on the property. No staining and/or odors were noted on the property. No visual evidence of sumps, drains or pits were noted at the subject property. No evidence of polychlorinated biphenyls (PCBs) was observed on the subject property. The United States Geological Survey (USGS) considers this a low exposure potential area for radon.

3.0 SITE HISTORY REVIEW

GeoSolve, Inc. examined fifteen (15) aerial photographs, eleven (11) historical topographic maps, and City Directories from 1970. All historical information was provided by Environmental Data Resources, Inc (EDR). Sanborn maps were not available for the subject property. Data for the photographs and topographic maps are tabulated below:

| AERIAL PHOTOGRAPHS EXAMINED | | |
|------------------------------------|--------------------------|------------------------------|
| <u>Flight Date</u> | <u>Approximate Scale</u> | <u>Identification Number</u> |
| 1939 | 1:6000 | USGS – 4384394.12 |
| 1946 | 1:6000 | USGS – 4384394.12 |
| 1949 | 1:6000 | USGS – 4384394.12 |
| 1958 | 1:6000 | USGS – 4384394.12 |
| 1966 | 1:6000 | USGS – 4384394.12 |
| 1968 | 1:6000 | USGS – 4384394.12 |
| 1974 | 1:6000 | USGS – 4384394.12 |
| 1982 | 1:6000 | USGS – 4384394.12 |

| 1993 | 1:24000 | 7.5-Minute Hayward Quadrangle |

3.1 Regional and Local History

3.11 Regional History

Ohlone Indians were the first documented inhabitants of the East Bay region. Archeological findings place the Ohlone Indian settlements as early as 8,000 b.c. with up to 40 native villages surrounding the Bay prior to European contact. European presence began with José de Galvez, the visiting-general from New Spain (Mexico), who wanted to increase New Spain’s territory for the Spanish crown. Senior Galvez sent a group of Spaniards into Alta California. José Francisco Ortega” scouted the region on behalf of Captain Don Gaspar de Portola and Father Junipero Serra established a chain of Franciscan missions beginning in 1769. By 1797, Mission San Jose de Guadalupe was established and was charged with converting the region’s natives to Roman Catholicism. Mexico broke relations with the Spanish crown in 1821 and the only land grant in

the East Bay was that of Luis Peralta, a 45,000-acre tract on the site of modern Oakland. However, the new Republic of Mexico encouraged colonization through the granting of homesteads. Guillermo Castro obtained Rancho San Lorenzo from Mexican governor Juan baptista Alvarado in 1840 and Francisco Soto obtained a sizeable grant of land west of modern Hayward's railroad tracks from the governor in the same year. Both families utilized converted Indians as vaqueros, to manage their ranches and tending to their cattle herds, which were sold overseas as hides, dried beef and tallow. With the discovery of gold at Sutter's Mill on January 28, 1848, the fate of California was changed forever. Hundreds of thousands of gold miners arrived in the Bay Area on their trek to the Sierra foothills. Many miners returned to the Bay Area as permanent settlers. Guillermo Castro foresaw the possibilities of the new settlers and in 1854 developed the town of San Lorenzo, later renamed to "Haywards" and finally to Hayward. However, in 1864, Castro moved to South America amidst gambling debts and loss of his fortune (Phelps and the Hayward Historical Society, 2004). By 1865, the former Mexican landowners sold their properties to American investors and the landscape drastically changed with the development of narrow gauge railroad from San Francisco, Alameda and "Haywards." By 1876, the town of "Haywards" was incorporated, initiating an era of urbanization and immigration.

Agriculturally, the East Bay was diversified. The area produced cherries, wheat, vegetables, peaches and other fruit cultivation ushered the development of Hunts Cannery. Grazing cattle was also very substantial in the East Bay region during the early settlements of the East Bay.

3.2 Aerial Photographic Site Features

Historical aerial photographs revealed several changes occurring at the subject property over the past 76 years. In 1939, the subject site was vacant and Gading Road was observed as a dirt road. Harder Road was observed north of the property and no structures were observed on the subject property or in the vicinity. By 1946, grading for a structure was observed on the western portion of the property and sporadic residences were observed north and south of Gading Road. By 1949, a residence and three out-buildings were observed on the western portion of the property, while no orchards were observed on the central and/or eastern portion of the property. By 1958, orchards were observed on the central portion of the property and increased development was observed further to the north, east, and west of the property. Gading Road appeared to be paved. By 1966 and 1968, one residence was observed on the western portion of the property and structures were observed immediately north and south of the subject property. Orchards were observed on the central portion of the property. By 1974, increased development was observed to the north, east and south of the property. An older residence and barn structure were observed on the western portion of the property and an apparent well was observed on the eastern portion of the site. No significant changes were observed on the subject property, with the exception of diminished

orchards from 1982 through 2009. By 2010, no structures were observed on the property and no significant changes were observed on the property in 2012. Copies of the aerial photographs are attached to the appendix.

3.3 Historical Topographic Map Site Features

In 1899, the subject property was mapped as vacant land and railroad tracks for Southern Pacific Railroad were mapped west and east of the property. The towns of Haywards and San Leandro were mapped northeast and north of the property. No significant changes to the subject property were mapped by 1915. By 1947, Gading Road was mapped and a structure was mapped on the subject property. Increased development was mapped in the surrounding areas from 1948 through 1959. Increased development was mapped in the surrounding area and no changes were mapped on the subject property from 1959 through 1993, with the exception of increased development in the vicinity. Copies of the historical topographic maps are attached to the appendix.

3.4 Review of Environmental LienSearch™ Report

The property is owned as a Deed and the title is vested in Filipino Community Christian Church And title received from Teresita B Danganan Josefino del Rosario Carolina on January 24, 1999 and recorded on January 28, 1999 under document number 990350. No environmental liens or other activity and use limitations were documented for the parcels. A copy of the EDR Environmental LienSearch™ Report is attached to the appendix.

3.5 Review of EDR City Directory Abstract

City directories were available from 1960 through 2002 and a summary of address listings is detailed in the table below. No listings were available from 1920 through 1959. A copy of the EDR City Directory Abstract is attached to the appendix.

| Date | Use/Listing | Source |
|------|------------------|-----------------|
| 1951 | Vacant | R.L. Polk & Co. |
| 1955 | William M Wilson | R.L. Polk & Co. |
| 1959 | William M Wilson | R.L. Polk & Co. |
| 1965 | William M Wilson | R.L. Polk & Co. |
| 1976 | William M Wilson | R.L. Polk & Co. |
| 2002 | Vacant | Haines |

3.6 EDR Vapor Encroachment Screen

EDR performed a Vapor Encroachment Screen report for the subject site. Based on the data, no sources of vapor intrusion were documented near or beneath the site. A copy of the EDR Vapor Encroachment Screen report is attached to the appendix.

3.7 Review of City and County Records

GeoSolve, Inc. visited the City of Hayward Building and Planning Departments to ascertain the past use of the property and reviewed microfiche files. Various permits and documents were discovered during our review and copies of the City Fire Reviews are attached to the appendix. A building permit application number 2405 and permit number 10816 was issued for the subject site on May 8, 1947. A building permit number 22312 dated March 14, 1962 was issued for a 670 square foot (sf) addition to an existing residence along Gading Road. Documents relating to a septic tank were identified and a plumbing permit number 27540 was issued on January 28, 1975 for a bathroom. A water heater was installed at the residence under plumbing permit number 37646 on February 27, 1980. An electrical permit number E55684 was issued on October 22, 1987 and a document relating to removing electricity from the well was issued on March 8, 1994. Another document indicated a boy was electrocuted on the property due to a hanging electrical wire over the well and a document dated July 16, 1998 indicated no running water was coming from the well. A demolition permit of the former residence was issued on June 28, 2009 under permit number B1-2009-1633.

In addition, *GeoSolve, Inc.* contacted the Alameda County Building Department and Assessor's Office to ascertain the past use of the property. According to Alameda County, building permits were recorded after 1949 for the City of Hayward. No permits were identified from the Alameda County Building Department. According to the Alameda County Assessor's Office, the property has an assessed value of \$300,007 in 2014-2015 with APN 453-5-63-2 and occupies approximately 1.74-acres. An apparent septic tank was discovered on the property from the City of Hayward record search and a groundwater-well was observed on the eastern portion of the property.

3.8 Review of Previous Environmental Reports

One previous Phase I ESA was obtained from Dutra Enterprises, which was prepared by Earth Systems Consultants of Northern California (ESC) dated April 2003. The Phase I ESA prepared by ESC indicated an older residence and garage were situated on the western portion of the property, along with fruit trees from a former orchard and a well was situated on the eastern portion of the property. Debris and household trash was reportedly observed around the older residence

and garage and ESC did not observe any hazardous substances/wastes around the property; however, did recommend collecting soil samples from the surficial soil for analysis for pesticides. A copy of the report is attached to the appendix.

3.9 Interviews with Property Owner

GeoSolve, Inc. attempted to contact the current property; however, the property owners have not completed the Property Owner Questionnaire as of the date of this Phase I ESA.

4.0 REVIEW OF PUBLIC RECORDS OF REGULATORY AGENCIES

4.1 Primary Contamination Sources

GeoSolve, Inc. contacted the ACWD to ascertain if any files were known for the site. According to the ACWD, no files are available for review for the subject site. In addition, *GeoSolve, Inc.* contacted the Alameda County Health Care Services Agency (ACHCSA) to ascertain if any files were available for review from the site. According to the ACHCSA website, no files are available for the subject site (<http://www.acgov.org/aceh/lop/findsite.htm>). *GeoSolve, Inc.* contacted the California Regional Water Quality Control Board – San Francisco Bay Region (RWQCB) to ascertain if any files and/or environmental assessment and/or spill or leak investigations and cleanups (SLIC) sites were available for the property. No SLIC sites were identified for the site (<http://geotracker.waterboards.ca.gov/map/?CMD=runreport&myaddress=25906+grading+road%2C+hayward%2C+ca>).

GeoSolve, Inc. also contacted the California Department of Toxic Substances and Control (DTSC) to ascertain if any files documenting the presence of hazardous wastes and/or hazardous substances were available for the subject site. No SLIC files were identified (http://www.envirostor.dtsc.ca.gov/public/mapfull.asp?global_id=&x=-119&y=37&z1=18&ms=640,480&mt=m&findaddress=True&city=25906%20grading%20rd,%20hayward,%20ca&zip=&county=&federal_superfund=true&state_response=true&voluntary_cleanup=true&school_cleanup=true&ca_site=true&tiered_permit=true&evaluation=true&military_evaluation=true&school_investigation=true&operating=true&post_closure=true&non_operating=true).

No information regarding active or closed files was available from these agencies.

The following is a summary of the potential Hazardous Substances in connection with identified uses:

ACMs and/or LBP

GeoSolve, Inc. conducted a walk-through of the site and no structures were identified on the property; however, a former residence was situated on the western portion of the property, which may have contained lead-based paint (LBP). Therefore, LBP may be in the surficial soil at hazardous waste levels.

Radon Gas

According to the EDR Radius Report, the Federal EPA Radon Zone for Alameda County is 2 and based on that the indoor radon average level is < 2 pCi/L. Radon gas levels exceeding 4 pCi/L within residential buildings is considered by the EPA to be inhabitable without radon gas mitigation.

Facility Storage Tanks (above or below ground)

No USTs were documented or permitted for the subject site and no visual evidence of USTs was identified during our site visit at the site.

Transformers or Other Electrical Equipment that uses Dielectric Fluid

No transformers were observed on and/or near the property.

Remediation and Site Closures

No site closures and/or remediation were documented for the subject site.

4.2 Secondary Contamination Source Sites

For the purposes of this investigation, a search was made of 98 State and Federal regulatory agency lists of contaminated or potentially contaminated sites, or properties where transportation, handling, storage, and/or disposal of hazardous materials occurs or has occurred.

In accordance with recently adopted standards by the American Standard for Testing and Materials (ASTM, 2013), details of the 98 databases which were searched are within the attached EDR, Inc.

Report. It should be noted that listings reported without location data were found to be more distant than the standard minimum search distance. In addition, some of the databases consist of lists of handlers, transporters, and generators of toxic materials rather than contaminated sites.

Out of all databases searched, one (1) secondary potential sites was identified within a 0.13-mile radius of the subject site as follows:

- **Redgwich Construction Company, 25599 Huntwood Avenue, Hayward** – Located approximately 448 feet northeast and cross-gradient from the site. This facility was listed on the CA FID UST, HIST UST and SWEEPS UST databases for the historic use of three 10,000-gallon diesel and one 1,000-gallon gasoline USTs. No other information was listed from the database.

Additionally, three (3) Aquiflow wells were identified within a 0.5-mile radius of the property. Aquiflow wells are used by EDR to provide data on the general direction of groundwater flow at specific points as well as depth to water table information. A summary of the water-wells situated within 1-mile are tabulated below.

| AQUIFLOW Site ID number | Distance from Site | Measurement Date | Flow Direction | Depth to water (feet bgs) |
|-------------------------|---------------------|------------------|----------------|---------------------------|
| 1 | 1/8 - 1/4 mile, N | 10/11/1995 | South, SW | 12.93 |
| A2 | 1/4 - 1/2 mile, WNW | 06/1991 | SW | 29 |
| A3 | 1/4 - 1/2 mile, WNW | 01/09/1996 | SW | 21 |

Based on EDR report dated August 17, 2015, the subject site is not situated within a 100- or 500-year FEMA Flood Zone. No Coal Gas site was found in a search of Real Property Scan's ENVIROHAZ database.

5.0 DATA GAPS

The following Data Gap was recognized:

- **GeoSolve, Inc.** did not receive a completed Owner's Interview Form as of the date of this Phase I ESA.

These data gaps did not alter our findings and/or recommendations for the site.

6.0 SUMMARY OF FINDINGS

GeoSolve, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-2013 at 25906 Gading Road in Hayward, California with APN 453-005-63-2 in Alameda County, California, the property. Any exceptions to, or deletions from, this practice are described in Section 5.0 of this report. This assessment has revealed one REC in connection with the property; namely: 1) possible presence of metal and organochloride pesticide residues within the surficial soil at the site.

The following summarizes the assessment of the subject site:

- The subject property is situated within the East Bay portion of the greater San Francisco Bay region within Alameda County. The site is located at 25906 Gading Road in the City of Hayward, California, and consists of one parcel totaling approximately 1.74-acres with APN 453-005-63-2. The property is occupied by a concrete slab near Gading Road and an older inactive groundwater well in the back of the property. No structures are situated on the property. The subject property is bounded by residential developments to the north, east, and south and Gading Road to the west. The local topography is relatively flat at approximately 40 feet above msl.
- Based on site observations, review of historical aerial photographs, topographic maps, and file review information, the property was initially developed in 1947 as a single-family residence with a garage, which was demolished in 2009. The location of the structures were on the western portion of the property. A septic tank is situated on the western portion of the property. In addition, an abandoned water well is situated on the eastern portion of the property and former electrical wires electrocuted a boy in 1998. Electrical service was removed from the site. Orchards were mapped in the vicinity of the property and the presence of fruit trees on the property suggests the property was former used as an orchard prior to development. In addition, no visual evidence to the existence of USTs was identified at the site. No ponds and/or lagoons, archeological findings or noxious odors were noted at the property.
- Only one REC was identified on the subject site, which included the following: 1) possible presence of metal and organochloride pesticide residues within the surficial soil at the site.
- Based on EDR information dated August 17, 2015, one secondary potential site was identified within a 0.18-mile radius of the subject property, which was located cross-gradient from the subject property.

7.0 SITE-SPECIFIC RECOMMENDATIONS

In view of the above findings, it is the opinion of *GeoSolve, Inc.* additional environmental assessment of the subject property **is warranted**, and should include the following:

- Collection of at least six (6) randomly located surficial soil samples from around the foundations of the subject site using clean stainless steel liners, which should be capped, labeled and placed within a pre-chilled ice chest for temporary storage and delivered under chain-of-custody documentation to a State-certified hazardous waste testing laboratory for analysis. The five surficial soil samples should be analyzed for arsenic, lead, and organochloride pesticides using Environmental Protection Agency (EPA) Methods SW3050B/SW6020 and SW846/8081. In addition, two background metal soil samples should be collected from the property corners and analyzed for arsenic and lead using EPA Methods SW846/6010B.

8.0 GENERAL RECOMMENDATIONS

In addition, the following recommendations should be considered if any future development of the property is planned:

- During grading activities of the property, soil technicians and operators must be aware of any basements, buried foundations, or reservoir discovered on the property. If any one of these conditions is encountered, then the Soil Engineer must be notified and the specific condition appropriately remedied in accordance with local, county and state requirements.
- During any grading activities of the property, soil technicians and operators must be aware of any unknown USTs, buried debris, or other potential adverse environmental condition which may be discovered on the property. If any one of these conditions is encountered, then the Soil Engineer must be notified and the specific condition appropriately remedied in accordance with the local, county, and state and RWQCB requirements.
- The groundwater water well must be property abandoned through the Alameda County Department of Pubic Works prior to development of the property.

9.0 PHASE II ENVIRONMENTAL SITE ASSESSMENT

9.1 Fieldwork

On August 18, 2015, a *GeoSolve, Inc.* field geologist visited the property in order to randomly collect six (6) surficial soil samples (S-1 through S-6) using clean laboratory supplied glass jars, which were manually inserted into the soil to approximately 0.5-foot below ground surface (bgs), sealed, labeled and placed within a pre-chilled ice chest for temporary storage. In addition, two background arsenic and lead samples (AS-1 and AS-2) were randomly collected from 3 feet bgs using clean laboratory supplied glass jars, which were sealed, labeled and placed within a pre-chilled ice chest for temporary storage. Soil samples S-1 through S-6, and AS-1 and AS-2 were delivered under chain-of-custody documentation to McCampbell Analytical, Inc., a State-certified hazardous waste testing laboratory (Certification No. 1644) in Pittsburg, California, for analysis. The location of soil samples S-1 through S-6 and AS-1 and AS-2 are shown on Figure 2, Site Plan.

9.2 Laboratory Analytical Methods and Results

Soil samples S-1 through S-6 were analyzed for arsenic, lead and organochloride pesticides using EPA Methods SW846/8081 and SW3050B/SW6020. Laboratory analytical results indicated mostly no detectable concentrations of organochloride pesticides (0.0010 milligrams per kilogram [mg/Kg]) to less than 0.12 mg/Kg. Chlordane was detected at concentrations ranging from not detected to 0.025 mg/Kg to 0.285 mg/Kg in soil sample S-6. DDT, DDE and DDD were detected at concentrations ranging from not detected to 0.074 mg/Kg, in sample S-5. Lead was detected at concentrations ranging from 23 mg/Kg to 110 mg/Kg in soil sample S-5, with an average lead concentration of 48.62 mg/Kg. Arsenic was detected at concentrations ranging from 6.1 mg/Kg to 15 mg/Kg, with an average arsenic concentration of 8.11 mg/Kg. Background metal samples AS-1 and AS-2 indicated arsenic concentrations of 7.7 mg/Kg and 6.9 mg/Kg and lead was detected at 25 mg/Kg and 55 mg/Kg. The laboratory analytical results are shown on Table 1, Analytical Results of Soil Samples and a copy of the McCampbell Analytical, Inc. laboratory analytical report and chain-of-custody document are attached to the appendix.

Table 1
Analytical Results of Soil Samples
25906 Gading Road
Hayward, California
August 18, 2015

| Sample ID | Depth (feet) | Arsenic (mg/Kg) | Lead (mg/Kg) | Dieldrin (mg/Kg) | Chlordane (mg/Kg) | DDT (mg/Kg) | DDE (mg/Kg) | DDD (mg/Kg) |
|-----------|--------------|-----------------|--------------|------------------|-------------------|-------------|-------------|-------------|
| S-1 | 0.5 | 6.1 | 26 | <0.005 | <0.12 | <0.005 | <0.005 | <0.005 |
| S-2 | 0.5 | 7.5 | 27 | <0.001 | <0.025 | 0.007 | 0.009 | <0.001 |
| S-3 | 0.5 | 7.2 | 23 | <0.001 | <0.025 | 0.0023 | 0.0019 | <0.001 |
| S-4 | 0.5 | 7.3 | 32 | <0.001 | <0.025 | 0.0022 | <0.001 | <0.001 |
| S-5 | 0.5 | 15 | 110 | <0.01 | 0.022 | 0.046 | 0.074 | <0.01 |
| S-6 | 0.5 | 7.2 | 91 | <0.005 | 0.285 | 0.032 | 0.036 | <0.005 |
| AS-1 | 3 | 7.7 | 25 | NA | NA | NA | NA | NA |
| AS-2 | 3 | 6.9 | 55 | NA | NA | NA | NA | NA |
| Average | --- | 8.11 | 48.62 | NA | NA | NA | NA | NA |
| ESLs | --- | 0.39* | 80 | 0.030 | 0.44 | 1.7 | 1.7 | 2.4 |

mg/Kg = milligrams per kilogram, equivalent to parts per million (ppm).
 ESLs = Environmental Screening Levels, RWQCB, December 2013, Table B.
 * = CalEPA uses background concentrations from arsenic (DTSC. 2015).

9.3 Discussion

The laboratory analytical results of the surficial soil samples collected and analyzed from the site indicated no elevated concentrations of pesticides, which were detected below the Environmental Screening Levels (ESLs) for organochloride pesticides established by the Regional Water Quality Control Board – Region 2 (December 2013, Table B) for residential development of 0.44 mg/Kg. Lead was mostly detected below the residential ESL of 80 mg/Kg in soil samples S-1 through S-4 and AS-1 and AS-2. Lead was detected slightly above the residential ESL of 80 mg/Kg in soil samples S-5 and S-6 of 110 mg/Kg and 91 mg/Kg; however, the average lead concentration is 48.62 mg/Kg, which is below the residential ESL. Although arsenic was detected above the ESL for residential development of 0.39 mg/Kg, background concentrations are used as cleanup goals by the California EPA (CalEPA). A maximum arsenic concentration of 15 mg/Kg was detected in the surficial soil at the site and is considered background for arsenic within Hayward and the surrounding region. Furthermore, in the Background Metal Concentrations in Soils within Northern Santa Clara County, California (Scott, 1991), the maximum concentration detected was 20 mg/Kg.

9.4 Conclusions and Recommendations

Based on the laboratory analytical results of soil samples S-1 through S-6 and background soil samples AS-1 and AS-2, *GeoSolve, Inc.* recommends further environmental assessment and/or additional environmental work **is not required** for the subject property.

10.0 LIMITATIONS

This environmental site assessment was performed according to the recommended guidelines established by ASTM designation E1527-2013 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report has been prepared for the specific application to this project in a manner consistent with the level of care and skill normally exercised by members of the environmental science profession currently practicing under similar conditions in this area. This report contains information reported to *GeoSolve, Inc.*, by other sources, accordingly, and errors or omissions may be present that *GeoSolve, Inc.* cannot be responsible for. The findings of this report apply to the present condition of the subject property only (as of August 18, 2015); the opinions expressed herein are subject to revision in light of new information relevant to the site and/or in its immediate surroundings. Results from Phase I environmental investigations are based on surficial evidence and public records and databases only. Subsurface conditions of the site cannot be properly evaluated without performing a subsurface environmental investigation and actually testing of the soil, and groundwater for potential contaminants.

12.0 ENVIRONMENTAL PROFESSIONAL QUALIFICATION

This Phase I Environmental Site Assessment was performed by Mr. Robert D. Campbell, a qualified Environmental Professional as defined in 40 CFR Part 312.10.

Mr. Campbell holds a Baccalaureate degree from U.C. Davis (an accredited institution of higher education) and a Master's of Science degree from C.S.U. East Bay (an accredited institution of higher education) in the discipline of Geology. Mr. Robert D. Campbell holds a valid Professional

Geology license in the State of California (6454); a valid Certified Engineering Geology license in the State of California (2089); and a valid Professional Geology license in the State of Arizona.

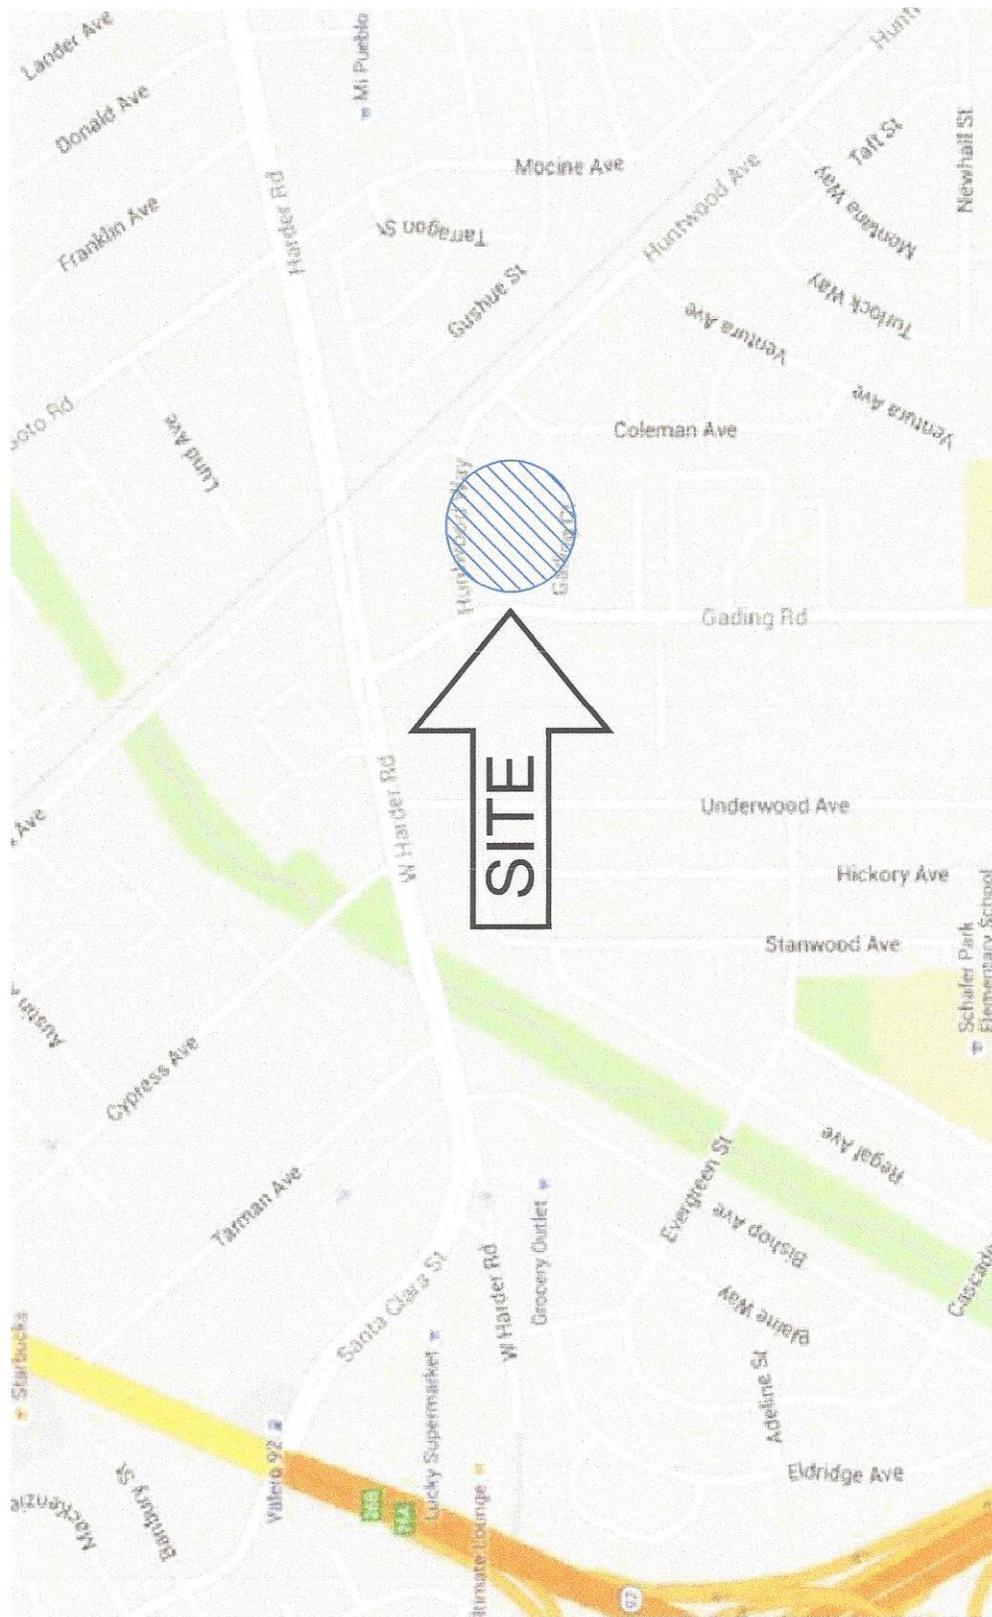

Mr. Campbell has over 25 years of environmental, geological and hydrogeological experience, more specifically in environmental assessments including Phase I and Phase II Environmental Site Assessments (ESAs), which exceeds the regulatory requirement of three years of relevant experience.

Mr. Campbell remains current in his field and has received 1.6 Continuing Education Units (CEUs) and 12 Professional Development Hours (PDHs) in the previous 12 month period. He is also compliant with OSHA HAZWOPER 8-hour refresher requirements, including medical surveillance. As required in 40 CFR 312.27, Mr. Campbell directly conducted the Field Visit including the visual inspection of the Site, adjacent properties and surrounding areas on August 18, 2015 as shown below.

“All Appropriate Inquiry” was also conducted by Mr. Campbell as were all interviews. The record search, historical photo and topographic map search were conducted by EDR, Inc. The findings, opinions and recommendations of this Phase I Environmental Site Assessment are those of *GeoSolve, Inc.* as formulated by Mr. Robert D. Campbell.

Subject: Proposed Church Site
Gading Road at Huntwood Way
Hayward, California
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Del Rosario:

As you requested, Earth Systems Consultants Northern California (ESCNC) is presenting the findings of this Phase I Environmental Site Assessment for the proposed Church site on Gading Road in Hayward, California. This assessment was conducted to identify areas of environmental concern, which may be a result of past or present usage, handling, or storage of hazardous materials on, or near the subject site. The scope of work performed for this assessment was based on ASTM standard E1527 and included a review of site usage, geologic and hydrogeologic literature, regulatory databases, and aerial photographs.

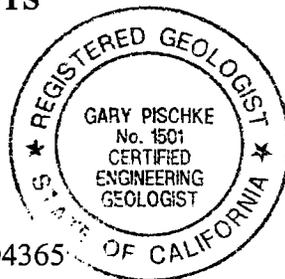

Our conclusions for the site show that the site has been primarily residential and not impacted by development. An irrigation well is located on the property. The local agencies will require destruction of the irrigation well if not used. A portion of the site has been used as an orchard. We recommend that the orchard portion of the site be sampled for pesticides including lead and arsenic.

We appreciate this opportunity to be of service. Should you have any questions or comments regarding this report, please feel free to contact us.

Very truly yours,

EARTH SYSTEMS CONSULTANTS
Northern California

PHASE ONE ENVIRONMENTAL SITE ASSESSMENT

**PROJECT: Proposed Church Site
Gading Road
Hayward, Alameda County, California**

CLIENT: Filipino Community Christian Church

I. INTRODUCTION

This Phase I Environmental Site Assessment was performed at the request of Mr. Joe Del Rosario for the Filipino Community Christian Church which is located on Gading Road, Hayward, Alameda County, California.

ESCNC understands the intended development of this property is for a Church. The purpose of this assessment was to identify areas of environmental concern, which may be a result of past or present use, handling, or storage of hazardous materials on, or near the subject site. The scope of work performed for this assessment was based on ASTM Standard E1527, and included a reconnaissance of the subject property, review of past and present site uses, interpretation of aerial photographs, review of geologic and hydrogeologic literature, and regulatory records review. Enclosed with this report are a Site Location Map (Figure 1), Site Plan (Figure 2), and Site Photographs (Appendix A). Also included is a copy of the Environmental Data Resources, Inc. (EDR) report used to assist in locating potential sources of environmental risk (Appendix B). A copy of the Sanborn no-coverage document is also included in Appendix B.

Site Description

The subject site, shown on Figure 2, is located on Gading Road and is oriented roughly east-west. The site is approximately 100 feet south of Huntwood Way. The property is generally flat with a slight slope to the west. A house and garage are located on the western portion of the site. The eastern portions of the site are generally vegetated with grasses. The eastern and northern sides are bordered with brush and trees. The property is shown as an approximately 1.7-acre site on the County parcel map. The site is not currently used, except for storage in the garage.

Adjacent Properties

Land use in the site vicinity is predominantly residential. Two apartment complexes are present on the northern boundary of the property. The eastern boundary is bordered by residential

parcels. The western boundary is Gading Road, and the southern boundary is bordered by an apartment complex and an open field.

Geology and Hydrogeology

The property is gradually sloping to the south and west, with the lowest portion on the southwestern side of the site. The elevation of the property ranges from approximately 47 feet above sea level to 45 feet sea level.

According to Dibblee (1980), the site is underlain by the Quaternary alluvium, composed of silty clay, silt and sand. The site is part of an older alluvial fan.

Soils at the site are within the United States Department of Agriculture Soil Conservation Service (1980) study area for Alameda County, Western Part. The county soils maps indicate the Danville soil series, which is classified as a silty clay loam. The Danville series consists of very deep, well drained soils formed in alluvium.

The site does not fall within an Earthquake Hazard Zone as defined by the California Geological Survey Earthquake Fault Zones maps. According to the Special Studies Zones Map, the closest potentially active fault, the Hayward, lies approximately one-half miles northeast of the site.

The inferred groundwater flow direction in this area is to the southwest. The EDR report indicates groundwater flow direction to the southwest. This assumption is based on the topography and the location and flow direction of the swales. Depth to groundwater at the site is unknown, but estimated to be greater than fifteen feet.

II. SITE RECONNAISSANCE

On April 11, 2003, an ESCNC representative performed a reconnaissance of the subject site. The intent of the reconnaissance was to document possible sources and visual evidence of contamination resulting from the use, storage or handling of hazardous materials on or adjacent to the subject site. Site photographs are shown in Appendix A.

The subject site is presently occupied by a house and garage. Golf carts are parked on the east side of the garage. The garage was used for the storage of church pews. The front driveway was

concrete with asphalt near the garage. Concrete debris and trash were visible on the site on the southeastern (Gading Road) corner of the site. A hose from the adjacent property appeared to be placed to discharge water or possibly oily water to the corner of the site. The area adjacent to the house appeared to be stained. The site is overgrown with grasses and trees. The house was vacant and appeared to be in poor condition. Trash was visible inside the house from the back door. Other household debris was present along the north fence line. Behind the house was the remnants of a small orchard of various fruit trees. The orchard was present in the north-central portion of the site. An irrigation well is present in the eastern central portion of the property. The well was not connected to electrical system. A power pole with no wires was adjacent to the well. The densely vegetated area along the eastern boundary was viewed and appeared to be used for household trash and debris disposal along the fence line.

The adjacent properties were observed during the reconnaissance along the perimeter of the site. The western boundary is a fence along Gading Road. The northern, eastern and a portion of the southern boundaries are fences adjacent to residential properties. The southeastern side of the site was not fenced and was open to the grass vegetated field on the adjacent property. A transformer was visible on the power pole on the adjacent property.

The property is essentially flat. No storm drains were observed on the property.

The subject site is presently on city water and sewer. A septic tank was reportedly found between the house and garage. A leach field may be present east of the septic tank. Utilities in the area are placed underground, except for electricity and telephone.

Transformers, Capacitors and Switches

No transformers were observed on the site. A transformer was observed on the power pole on the adjacent site to the south. Capacitors and switches were not observed on the site.

Ponds, Pools, Sumps, & Lagoons

No ponds, pools, sumps and lagoons were observed at the site.

Storage Tanks and Drums

Neither above ground or underground storage tanks were noted at this site. A septic tank was reported between the house and garage. The septic tank was reportedly backfilled.

Wells

One irrigation water well was observed on the eastern portion of the site. The well appeared to be in poor condition. A power pole was adjacent to the well, and a shed was covering the well.

Vegetation and Surface Staining

Surface Vegetation consisted of grasses and brush. Orchard trees are present on the north central portion of the site. Trees and brush are growing along the eastern border and around the existing house.

Asbestos

An asbestos survey was not conducted for this site.

Lead Paint

A lead paint survey was not conducted for this site.

III. HISTORICAL SITE USE AND OWNERSHIP

Historical use and ownership of the site was developed through interpretation of aerial photographs, review of historical topographic maps, and interviews with persons knowledgeable about the site. No Sanborn Fire Insurance Maps were available for this site. A no coverage letter for Sanborn maps is included in Appendix B.

Aerial Photographs

ESCNC reviewed aerial photographs of the site area in order to determine past uses of the site and surrounding areas. The aerial photographs were obtained from Pacific Aerial Survey. A summary of the aerial photograph review is presented below. The summary is interpretive and based on observation of the specific photographs listed below.

March 24, 1947 (Black and White, AV 11 05-29,30 Scale = 1:20,000):

The 1947 photographs show the site as grasslands within a generally rural area. No houses are east of the site. The railroad track is visible further to the east. Farm buildings are present north and south of the site. No houses or other buildings are present on the site. Gading Road is visible west of the site. A

greenhouse and stockyard building are present to the west of Gading Road. No environmental concerns are visible.

March 2, 1954 (Black and White, AV-119-2-02-,21 Scale = 1:10,000)

The house and garage are visible in the 1954 photographs. Agricultural buildings are present north and south of the site. Houses are built on the eastern boundary of the site. A possible water well building is present in the eastern half of the subject site. The area and vicinity remains generally agricultural. No environmental concerns are visible.

July 8, 1959 (Black and White, AV-337-08-57,58, Scale = 1:9,600):

The available aerial photograph for 1959 show the house and garage at the site. A water well is visible in the eastern portion of the site. The eastern half remains as grasses. Houses are present to the east and north of the site. Row crops are also visible behind the house. Greenhouses and orchards are present to the west across Gading Road. No environmental concerns are visible.

July 26, 1963 (Black and White, AV-550 11-26,27, Scale = 1:36,000)

Similar conditions are visible at the site in the 1963 photographs. No environmental concerns are visible on the site. The adjacent properties have similar uses. The eastern portion of the site remains grasses. The area remains mostly rural.

May 2, 1969 (Black and White, AV-902-07-39,40,41, Scale 1: 12,000)

The site conditions remain similar to previous years. Trees are planted to the east of the house, but are not placed in an orchard pattern. Row crops are still visible to the east of the house and garage. The houses on the north boundary have been replaced by apartment buildings. The well house is visible on the eastern portion of the site. Gading Road continues as a straight roughly north-south road. The area is increasingly built up with houses, becoming more residential. Huntwood Way has been graded and houses removed in the right-of-way. Gading Road has been widened. A portion of the front driveway to the garage has become part of the widening for Gading Road.

May 6, 1975 (Black and White, AV-1193-07-35,36, Scale 1:12,000)

The 1975 photographs show similar conditions on the site. Small trees have been planted as an orchard east of the house. The vicinity remains similar in conditions to the previous years. The adjacent site to the south is commercial. The eastern portion of the adjacent site has been mown.

September 6, 1979 (Black and White, AV-1750-07-47,48 Scale = 1:12,000):

The 1979 photographs show similar conditions at the site. Multiple trees are visible in the orchard on the site. The areas north of Huntwood Way appear commercial. The eastern portion of the site remains as grasses. More trees have grown on the eastern boundary. The area west of Gading Road is commercial buildings.

May 15, 1985 (Black and White, SCL AV-2640-07-44,45, Scale 1:12,000)

The 1985 show similar conditions on the site. Vehicles are parked next to the garage. Gaps in the grasses on the eastern side of the site show alluvial conditions. No environmental concerns, except the orchard area, are present on the photos for the site.

July 17, 1990 (Black and White, SCL AV-3845-16-42,43, Scale 1:12,000)

The 1990 show conditions at the site similar to previous conditions. Cars are parked adjacent to the garage. The orchard appears to be in poor condition. The vicinity of the site is more mixed commercial and residential.

October 8, 1996 (Black and White, SCL AV-5200-18-41,42, Scale 1:12,000)

The site in the 1996 photos is similar to past conditions. Grasses are visible on the eastern portion of the site. More trees and brush are visible around the house. The grasses have been cut on the site and the adjacent parcel to the south. No environmental concerns are present on the photos for the site parcels.

September 26, 2002 (Black and White, SCL AV-8202-17-40,41, Scale 1:12,000)

The 2002 show conditions at the site similar to present day conditions. The area is a mixture of commercial apartments and residential houses. The orchard is nearly gone. The house and garage appear to be more overgrown.

Historical Topographic Maps

ESCNC reviewed topographic maps produced by the U.S. Geological Survey in 1959, 1968 and 2000. The 1959 map was photo-revised in 1968. These maps display manmade as well as geographic features, which aid in the development of a site history. The maps show the site as urban area and do not delineate the buildings or other features.

Interviews

Mr. Joe Del Rosario, Church Board Chair, was interviewed concerning the property. He has been involved with the parcel for approximately six years. He stated that the current property owner is the Filipino Community Church. The property was transferred to the church two years ago. Mr. Del Rosario was a cosigner for the property prior to the church's purchase. Mr. Del Rosario stated that the previous owner was Marchand Enterprises, based in San Ramon. The current property use is residential with a house and garage. No hazardous material was reported stored at the site. One well was reportedly present on the site, and may be destroyed. Mr. Del Rosario reported that a septic tank was found between the house and the garage. The septic tank was backfilled. He does not know the extent of the leach field.

IV. LITERATURE SEARCH

Flood Zones

According to the National Flood Insurance Rate Map (dated February 9, 2000) for the City of Hayward, the site has been is designated as Zone C, which is designated as areas of minimal flooding.

Potable Water

The East Bay Municipal Utility District distributes potable water for this area. The water originates from the Sierra Nevada.

Ownership

Current ownership is the Filipino Community Christian Church.

All that real property situated in the City of Hayward, County of Alameda, State of California, described as follows:

Lot 2, Block "T", as said Lot and Block are shown on the "Map of EXTENSION OF THE MEEK ORCHARD TRACT, Eden Township, Alameda County, California 1911", filed May 16, 1912, Map Book 26, Page 93, Alameda County Records.

EXCEPTING THEREFROM that portion thereof conveyed to the City of Hayward by Deed recorded September 25, 1967, Reel 2043, Image 140, Series No. AZ-096499, Alameda County Records (A.P.N. 453-0005-063-02).

Wells

ESCNC reviewed the oil well list for Alameda County. No oil wells are listed for the property. The EDR lists multiple wells within a one mile radius of the site. Most of the wells are residential irrigation wells.

Radon Gas

According to the EPA's Map of Radon Zones for California, dated September 1993, from the EDR report, Alameda County is in radon zone two. Areas within radon zone two have an average predicted indoor radon screening potential between 2 picocuries per liter (pCi/L) and 4 pCi/L. Levels greater than 4 pCi/L may be considered hazardous. Tested houses in Alameda County for the site's zip code have been reported at an average activity of 0.100 pCi/L.

Zoning

According to the City of Hayward Planning Department, this site is zoned RS- single family residential.

V. REGULATORY AGENCY REVIEW

To facilitate the regulatory agency review, ESCNC requested a database search from Environmental Data Resources, Inc. (EDR). EDR conducted a search of 41 governmental databases in order to identify environmental violations, use and storage of hazardous materials, or reported loss of hazardous materials at the subject site and within a one-mile radius of the

subject site. For a complete listing of the databases searched and facilities identified, please see the EDR report provided in Appendix B.

EDR identified multiple facilities within one-mile of the subject site. The facilities identified by EDR are listed in the attached report. None of the identified facilities were located within 1/8-mile radius of the subject site. The facility shown on the EDR map within the 1/8-mile radius is mislocated. The databases and respective search radii include the following:

| Agency | Database | Type of Records | Radius of Search |
|-----------------------------|----------------|--|------------------|
| US EPA | NPL | National Priority List | 1 mile |
| US EPA | Prop. NPL | National Priority List-Proposed | 1 mile |
| US EPA | CERCLIS | Comprehensive Environmental Resp. | 0.5 mile |
| US EPA | CERCLIS/NFRAP | Sites US EPA- No further action planned | 0.25 mile |
| US EPA | CORRACTS | RCRA Corrective Action | 1 mile |

| State | AST | Registered aboveground Storage tanks | 0 mile |
| State | CLEANERS | Cleaner Facilities | 0.25 mile |
| State | CA WDS | Waste Discharge System | 0 mile |

| Agency | Database | Type of Records | Radius of Search |
|--------|----------|--|------------------|
| State | DEED | Sites with deed restrictions | 0 mile |
| State | NFA | No Further Action Determination | 0.25 mile |
| State | REF | Unconfirmed Properties Referred | 0.25 mile |
| State | SCH | School Property Evaluation Program | 0.25 mile |
| State | NFE | Properties Needing Further Evaluation | 0.25 mile |
| State | CA SLIC | Facility Inventory- underground Storage tanks | 0.25 mile |
| State | HAZNET | Hazardous Waste Information System | 0.25 miles |
| State | Coal Gas | Hazardous Materials Facilities | 0.5 miles |

According to the EDR report, the subject site is not listed in the databases. Eleven sites are listed on the CHMIRS database; twenty-two on the Cortese database; one on the Notify 65 database; seven on the LUST database; one on the UST database; four on the CA FID UST database; and four on the HIST UST database.

Records Review

As part of the Phase I Site Assessment process, ESCNC requests access to and reviews available regulatory agency files pertaining to facilities that were identified by EDR on a governmental database and:

- are located adjacent to, or up-gradient of and within a 1/8-mile radius of the subject site; or
- appear on a Superfund-related database and are within a 2,000-foot radius of the site. Superfund related databases include NPL, SPL, SCL, CORRACTS, Cerclis, and CalCerclis.

None of the identified facilities listed above fit these criteria. The nearest site is crossgradient or downgradient of the subject site.

VI. CONCLUSIONS/RECOMMENDATIONS

ESCNC conducted a site reconnaissance and reviewed documentation regarding the site in April 2003. In addition, a site history was developed through the use of aerial photographs, review of the EDR report, and interviews. As a result of the work described above, no environmental concerns were found, except for the past presence of an orchard on the site. The irrigation well

on the property should be destroyed, if not used. Pesticides were most likely used on the site. We recommend that the orchard area be tested for pesticides associated with orchards.

A report was prepared by EDR, which conducted a search of 41 governmental databases to determine possible past or present environmental violations, use and storage of hazardous materials, or reported loss of hazardous materials at the subject site and within a one-mile radius of the subject site. None of the site have the potential to impact the subject site. ESCNC does not believe the facilities identified by EDR pose a threat to the subject site.

LIMITATION

This Phase I Site Assessment was performed at the request of Filipino Community Christian Church for the site located on Gading Road in Hayward, California.

It should be noted that any level of assessment cannot ascertain that a property is completely free of chemical or toxic substances; therefore, ESCNC cannot offer the certification of a "clean" property. We believe the scope of work performed has been appropriate to allow an owner, prospective buyer, or seller to make an informed business decision.

The results contained in this report are based upon the information acquired during the assessment. Also, changes in conditions found could occur at some time in the future due to contaminant migration, variations in rainfall, temperature, and/or other factors not apparent at the time of the field reconnaissance.

The services performed by ESCNC have been conducted in a manner consistent with the level of care and skill ordinarily exercised by members of our profession currently practicing under similar conditions in this area of California. No other warranty is expressed or implied.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. Search distances are per ASTM standard or custom distances requested by the user.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STATE ASTM STANDARD

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 12/31/2001 has revealed that there are 11 CHMIRS sites within approximately 1 mile of the target property.

CORTESE: This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, has revealed that there are 22 Cortese sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

NOTIFY 65: Notify 65 records contain facility notifications about any release that could impact drinking water and thereby expose the public to a potential health risk. The data come from the State Water Resources Control Board's Proposition 65 database.

A review of the Notify 65 list, as provided by EDR, has revealed that there is 1 Notify 65 site within approximately 1 mile of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Dist / Dir</u> | <u>Map ID</u> | <u>Page</u> |
|-------------------------------|-------------------------|-------------------|---------------|-------------|
| KARDA AUTO CLINIC | 26699 MISSION BOULEVARD | 1/2 - 1 E | 49 | 49 |

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 01/06/2003 has revealed that there are 7 LUST sites within approximately 0.5 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, has revealed that there are 5 HAZNET sites within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and certifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/29/03

Date Made Active at EDR: 03/04/03

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 02/04/03

Elapsed ASTM days: 28

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/13/02

Date Made Active at EDR: 01/15/03

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/26/02

Elapsed ASTM days: 20

Date of Last EDR Contact: 12/26/02

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

FEDERAL ASTM SUPPLEMENTAL RECORDS

BRS: Biennial Reporting System

Source: EPA/NTIS

Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/99
Database Release Frequency: Biennially

Date of Last EDR Contact: 03/17/03
Date of Next Scheduled EDR Contact: 06/16/03

CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices

Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: N/A
Database Release Frequency: Varies

Date of Last EDR Contact: N/A
Date of Next Scheduled EDR Contact: N/A

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 01/09/03
Database Release Frequency: Annually

Date of Last EDR Contact: 01/07/03
Date of Next Scheduled EDR Contact: 04/07/03

DELISTED NPL: National Priority List Deletions

Source: EPA
Telephone: N/A

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/29/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 02/04/03
Date of Next Scheduled EDR Contact: 05/05/03

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report

Source: EPA
Telephone: N/A

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 01/14/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/06/03
Date of Next Scheduled EDR Contact: 04/07/03

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation
Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 11/30/02
Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/03
Date of Next Scheduled EDR Contact: 04/21/03

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/16/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/06/03
Date of Next Scheduled EDR Contact: 04/07/03

MINES: Mines Master Index File

Source: Department of Labor, Mine Safety and Health Administration
Telephone: 303-231-5959

Date of Government Version: 09/10/02
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/03/03
Date of Next Scheduled EDR Contact: 03/31/03

NPL LIENS: Federal Superfund Liens

Source: EPA
Telephone: 205-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/91
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 02/27/03
Date of Next Scheduled EDR Contact: 05/26/03

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-564-3887

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/12/02
Database Release Frequency: Annually

Date of Last EDR Contact: 02/10/03
Date of Next Scheduled EDR Contact: 05/12/03

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 03/10/03
Date of Next Scheduled EDR Contact: 06/09/03

TRIS: Toxic Chemical Release Inventory System

Source: EPA
Telephone: 202-260-1531

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/00
Database Release Frequency: Annually

Date of Last EDR Contact: 12/26/02
Date of Next Scheduled EDR Contact: 03/24/03

TSCA: Toxic Substances Control Act

Source: EPA
Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/98
Database Release Frequency: Every 4 Years

Date of Last EDR Contact: 03/06/03
Date of Next Scheduled EDR Contact: 06/09/03

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA
Telephone: 202-564-2501

Date of Government Version: 01/28/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/26/02
Date of Next Scheduled EDR Contact: 03/24/03

SSTS: Section 7 Tracking Systems

Source: EPA
Telephone: 202-564-5008

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/00
Database Release Frequency: Annually

Date of Last EDR Contact: 01/21/03
Date of Next Scheduled EDR Contact: 04/21/03

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FTTS: FIFRA TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA/Office of Prevention, Pesticides and Toxic Substances

Telephone: 202-564-2501

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/28/03
Database Release Frequency: Quarterly

Date of Next Scheduled EDR Contact: 03/24/03

DEED: List of Deed Restrictions

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe
exposures to hazardous substances and wastes.

Date of Government Version: 01/03/03
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/06/03
Date of Next Scheduled EDR Contact: 04/07/03

NFA: No Further Action Determination

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

This category contains properties at which DTSC has made a clear determination that the property does not pose
a problem to the environment or to public health.

Date of Government Version: 02/28/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/11/03
Date of Next Scheduled EDR Contact: 06/02/03

REF: Unconfirmed Properties Referred to Another Agency

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

This category contains properties where contamination has not been confirmed and which were determined as not
requiring direct DTSC Site Mitigation Program action or oversight. Accordingly, these sites have been referred
to another state or local regulatory agency.

Date of Government Version: 03/18/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/11/03
Date of Next Scheduled EDR Contact: 06/02/03

SCH: School Property Evaluation Program

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous
materials contamination. In some cases, these properties may be listed in the CalSites category depending on the
level of threat to public health and safety or the environment they pose.

Date of Government Version: 02/28/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/11/03
Date of Next Scheduled EDR Contact: 06/02/03

NFE: Properties Needing Further Evaluation

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated
properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC is
currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but
not currently underway.

HAZNET: Hazardous Waste Information System
Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY HISTORICAL DATABASES

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

STATE OF CALIFORNIA BROWNFIELDS DATABASES RECORDS

VCP: Voluntary Cleanup Program Properties
Source: Department of Toxic Substances Control
Telephone: 916-323-3400

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 02/28/03
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/05/03
Date of Next Scheduled EDR Contact: 06/02/03

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

USGS TOPOGRAPHIC MAP ASSOCIATED WITH THIS SITE

Target Property: 2437122-F1 HAYWARD, CA
Source: USGS 7.5 min quad index

GENERAL TOPOGRAPHIC GRADIENT AT TARGET PROPERTY

Target Property: General WSW

Source: General Topographic Gradient has been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Site-Specific Hydrogeological Data*:

Search Radius: 2.0 miles
 Status: Not found

AQUIFLOW®

Search Radius: 2.000 Miles.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

| | |
|---------|---|
| Era: | Cenozoic |
| System: | Quaternary |
| Series: | Quaternary |
| Code: | Q (decoded above as Era, System & Series) |

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Component Name: DANVILLE

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|----------------------------|---|---|---------------------------|------------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Permeability Rate (in/hr) | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 18 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 0.60 Min: 0.20 | Max: 7.80 Min: 6.60 |
| 2 | 18 inches | 38 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 0.20 Min: 0.06 | Max: 8.40 Min: 6.60 |
| 3 | 38 inches | 50 inches | gravelly - sandy clay loam | Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand. | COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. | Max: 0.60 Min: 0.20 | Max: 8.40 Min: 7.40 |
| 4 | 50 inches | 67 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 0.60 Min: 0.20 | Max: 8.40 Min: 7.40 |
| 5 | 67 inches | 78 inches | stratified | Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand. | COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. | Max: 0.60 Min: 0.20 | Max: 8.40 Min: 7.40 |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 clay loam
 silt loam
 clay

Surficial Soil Types: loam
 clay loam
 silt loam
 clay

Shallow Soil Types: gravelly - sandy clay loam

Deeper Soil Types: sandy clay loam
 silt loam
 clay
 silty clay loam

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the national Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

STATE RECORDS

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations for District 2, 3, 5 and 6

Source: Department of Conservation

Telephone: 916-323-1779

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

January 27, 1994
25906 Gading Rd.

Met with Rick Blanton, Carlos Ferreyra, Suzanne Whalley, Larry Robinson, Duke Bragg and Bill Mork.

A person living at the site, (Bill, son of the owner), allowed inspection of the building. After entering the rear entrance, He said the tenant was not at home and did not know if I should enter. I left the interior and inspected the exterior. A short time later another tenant allowed me to enter and inspect the interior of the building.

VIOLATIONS

- Numerous broken windows that need replacing. UHC sec. 1001 (h) 2
- Fire damage at the rear of the building that needs to be scraped and painted.
- Rear bedroom window that is boarded over and needs to be replaced.
- Prune the trees from over the roof.

Kitchen

- The floor at the rear entrance is water damaged. With a building permit, replace the water damaged flooring and sub-floor.
- Replace the rear exterior door and lock set.
- Repair the South wall where there is exposed wiring. UHC sec. 1001 (e)
- The water heater is deteriorated and needs to be replaced. Obtain Plumbing permit for the repair.

Hall

- Install smoke alarm.
- The gas wall heater is damaged. With Mechanical permit, replace the wall heater.
UBC sec. 1212 UHC 1001 (b) 6

Bathroom

- The shower shows water damage. With building permit, replace the shower enclosure.
- The bathroom floor is water damaged. With building permit, replace the flooring.

Interior

- Remove all debris causing a fire hazard. UHC sec. 1001 (i)
- The water to the building is not connected. This renders the building uninhabitable.
UHC sec. 1001 (b) 1, 3, 5, 13

Due to the nature of the building, debris within the building and inadequate lighting, this inspection was cursory in execution.

Water & sewer must be connected to public services. The Building Official will not allow the well to be used for Potable water.

UHC sec. 1001 (b) 14

January 28, 1994

Delmis Belrose, of Building Inspection, let me that a previous inspection had taken place at this site during July of last year. I went to the tower files and found information regarding the previous inspection(s). A letter had been sent to the tenants/owners regarding the lack of water at that time; however, the letter had been sent back (return to sender). Before I post the building I will talk with Carlos Ballodano to determine what He would like me to do.

January 28, 1994
25906 Gading Rd.

Met with Rick Blanton, Carlos Ferreyra, Duke Bragg at site. Also, along was Marsh Lang-Collins who was observing.

I posted a "Notice and Order" on the front of the building near the entry door. There was no one at home to give the letter too regarding the necessity to make repairs within ten (10) days of this date, (with an additional floating five (5) days). Sending a letter to the Attorney of the property also stating that the repairs must be made within the next ten days.

NARRATIVE

3631 11/24/1993
INSPECTOR'S BURATTO & MONTEVAGO

RESPONDED TO 25906 GADING ON A BUILDING FIRE. UPON ARRIVAL WE MET WITH INCIDENT COMMANDER FERNANDES. B.C. FERNANDES TOLD US THAT THE FIRE APPEARED SUSPICIOUS SO HE CALLED FOR THE ON-CALL INSPECTORS.

FIRE SCENE:

THIS WAS A SINGLE FAMILY DWELLING, WOOD FRAME WITH WOOD SIDING. THE STRUCTURE WAS IN A RUN-DOWN CONDITION WITH ALMOST ALL THE EXTERIOR WINDOWS BROKEN, WITH SHEETS COVERING THEM. THE INTERIOR WAS WORSE. THE CEILING OVER THE STOVE IN THE KITCHEN HAD BURNT PAINT AND THE STOVE DID NOT APPEAR TO HAVE BEEN CLEANED IN YEARS. THERE WAS TRASH AND EMPTY FOOD CONTAINERS ALL OVER THE PLACE. WATER SERVICE APPARENTLY HAS NEVER BEEN IN EXISTENCE TO THIS PROPERTY ACCORDING TO THE HAYWARD WATER DEPARTMENT. THE GAS WALL HEATER HAS BEEN DISCONNECTED AND CAPPED - OFF. THE TOILET WAS FILLED WITH HUMAN EXCRETEMENT AND DID NOT APPEAR TO HAVE BEEN FLUSHED FOR WEEKS. THE HOUSE WAS NOT INHABITABLE AND YET IT WAS BEING UTILIZED BY MS WILSON. ALSO ACCORDING TO HAYWARD WATER PERSONNEL, THERE IS NO SEWER HOOK-UP FOR THE PROPERTY.

IN THE NORTHEAST CORNER THERE WAS A BEDROOM. THE WINDOW ON THE EAST WALL WAS BROKEN OUT AND HAD A SHEET OVER IT AS A DRAPE. THE FIRE DAMAGE WAS PRIMARILY LOCATED AT THIS WINDOW. BOTH THE INSIDE AND OUTSIDE OF THE LOWER WINDOW AREA WERE CHARRED. THE WINDOW FRAME IN THE UPPER AREA WAS SLIGHTLY CHARRED AND THE REMAINS OF CLOTH DEBRIS WAS FOUND ON THE FLOOR UNDER THE WINDOW AREA. ALSO ON THE EXTERIOR OF THE BUILDING THERE WAS A CHAR PATTERN BELOW THE WINDOW THAT WAS MADE BY A PIECE OF CLOTH FALLING ONTO THE WINDOW SILL WHILE BURNING. THE SAME PATTERN WAS FOUND INSIDE ON THE WALL. THEREFORE, IT WAS APPARENT THAT THE DRAPES HAD IGNITED AND FALLEN ACROSS THE WINDOW SILL AND BURNT THE INTERIOR AND EXTERIOR OF THE WINDOW. THE GLASS FROM THE WINDOW WAS ALMOST NONEXISTENT EITHER ON THE FLOOR INSIDE OR ON THE GROUND OUTSIDE. SO THE WINDOW HAD TO BE BROKEN OUT LONG BEFORE THE FIRE.

THERE WAS NO EVIDENCE EITHER OUTSIDE OR INSIDE THE HOUSE AS TO THE IGNITION SOURCE OF THE FIRE. THERE WAS NO ELECTRICAL APPLIANCE OR HEATING APPLIANCE IN THE AREA. INSIDE THE BUILDING THERE WAS ANOTHER FIRE IN FRONT OF THE WALL HEATER. ACCORDING TO THE TENANT, MS WILSON, SHE HEARD A NOISE FROM THE REAR BEDROOM, SAW A FLASHING LIGHT AND WENT TO THE ROOM. WHEN SHE SAW THE FIRE, SHE SAID THAT SHE PULLED DOWN THE BURNING DRAPES AND IN THE PROCESS OF STOMPING OUT THE FIRE, SHE CARRIED SOME OF THE BURNING DRAPE AROUND TO THE HALLWAY IN FRONT OF THE HEATER BEFORE THE FIRE WENT COMPLETELY OUT.

CONCLUSION:

THIS WAS DEFINITELY AN INCENDIARY FIRE, DELIBERATELY SET BY SOMEONE. LACK OF EVIDENCE FOR THE IGNITION SOURCE INDICATES THE DRAPES WERE DELIBERATELY SET ON FIRE. WE WERE UNABLE TO DETERMINE IF THE DRAPES WERE IGNITED FROM THE INSIDE OR THE OUTSIDE AS THEY HAD BEEN TOTALLY CONSUMED. THE TENANTS HAVE NO WATER OR

GAS HEAT AT THIS TIME AND THE INTERIOR OF THIS HOUSE IS FULL OF FOOD DEBRIS AND THE SEWER IS APPARENTLY UNABLE TO WORK. INSPECTOR BURATTO WILL CONTACT BUILDING DEPARTMENT AND COMMUNITY PRESERVATION PLUS THE HEALTH DEPARTMENT TO TRY AND REMOVE THE TENANTS AS THIS STRUCTURE IS DEFINITELY NOT INHABITABLE.

FOLLOW-UP TO HPD REPORT NUMBER 93-31432.

CITY OF HAYWARD)

The undersigned hereby certifies and declares as follows:

That he or she is now and was at all times mentioned herein a citizen of the United States of America, over the age of eighteen years, competent to be a witness in any proceeding concerning the matters set forth herein, employed at 25151 Clawiter Road, Hayward, Alameda County, California in the Building Inspection Division, Community and Economic Development Department, a municipal corporation, located in Alameda County, State of California, and the Building Official of said City or acting for and on his behalf, as indicates below.

That the names and addresses set forth on the within notice are the names and addresses of each person owning the real property referred to in said notice or some part thereof as such names and addresses appeared on the last equalized assessment roll of the County of Alameda, California, as of the date of service of said notice, and the names and addresses of each mortgagee or beneficiary under a deed of trust of said real property shown on the official records of Alameda County, California, and their addresses last known or unknown to the Building Official, as indicated on said notice, as of the date of service of said notice.

That he or she served the within notice as indicated below by the check mark opposite the applicable paragraph.

[] That he or she personally delivered a true, complete, and correct copy of the within notice to each of the following named persons on the date and at the place set forth opposite or below his name, to wit:

Owner and property address: Dennis Natali/25906 Gading Rd.

[x] That on January 28, 1994, he or she deposited in the United States mail in the City of Hayward, Alameda County, California, with proper and necessary postage fully prepaid thereon, sent by first class, certified mail with return receipt requested, a sealed envelope enclosing a true, complete, and correct copy of the within notice, addressed to each of the following named persons at the address set forth opposite or below his name, to wit:

Mr. Dennis Natali
Van Ness Plaza
1650 Mission St. Ste. 500
San Francisco, CA 94103

[x] That on January 28, 1994, he or she posted a true, complete, and correct copy of the within notice on a conspicuous place on the building or structure described in the within notice, to wit:

25906 Colling Rd.

That the foregoing is true and correct under penalty of perjury.

Executed this _____, 19____, at Hayward, California.

Building Official, City of Hayward

Re: 25906 Gading Road

Dear Mr. Havlik:

The purpose of this letter is to confirm our discussion of February 16, 1994 in which I agreed and you accepted the extension until March 1, 1994 of the "Notice and Order" to vacate the above referenced property.

As I indicated, City staff is willing to work with you and your clients to assure a smooth transition to an alternate housing site.

Please be advised that this is the last extension I will provide on this property.

Sincerely,

Carlos Baltodano
City Building Official

NOTICE AND ORDER TO DEMOLISH, REMOVE OR REPAIR BUILDING OR STRUCTURE
dated January 28, 1994

Re: 25906 Gading Road, Hayward, California; Parcel 063; Block 0005;
Map Book 453

PLEASE TAKE NOTICE THAT WILLIAM WILSON AND CAROL WILSON APPEAL
THE NOTICE, AS ABOVE DESCRIBED, TOGETHER WITH THE CONTENTS OF
SAID NOTICE AND ORDER.

The basis of said appeal includes, but is not limited to the
following:

1. Notice was improper inasmuch as the referred to attachments were not included.
2. Notice lacked specificity and is overbroad, resulting in an inability to comply with said notice and order.
3. Improper notice is provided to the title holders of said property inasmuch as there may be need to appoint a conservator to protect the rights of William Wilson, Sr.
4. The notice and order is absent any code sections on which to base the City's claim for demolition, removal or repairs.
5. The Notice/Order refers to demolition, removal or repairs "as herein after specified" and there has been no such specification.
6. A notice is inadequate to define and perform repairs.

Re: 25906 Gading Road

Dear Mr. Wilson:

NOTICE AND ORDER

It has been brought to our attention that the dwelling located at 25906 Gading is not equipped with any running water.

The Uniform Building Code, Section 1205 (d) Sanitation, requires that every dwelling unit be provided with hot and cold running water. This is in violation of the Hayward Municipal Code, Chapter 9, Article 3, Section 9-2.302 #14. The structure is therefore substandard and inhabitable.

This is a "Notice and Order" for you to either vacate the unit and properly secure it or obtain the proper permits and inspections in order to provide running water to the unit. Compliance with this notice must be done within ten (10) days of receipt of this letter.

If you have any questions, please call me at 293-5254.

Sincerely,

Carlos Baltodano
City Building Official

VIOLATION LIST

| <u>TYPE VIOLATION/CORRECTION</u> | <u>DATE CLEARED</u> |
|---|----------------------------|
| 25906 Gading Rd: | |
| Numerous broken windows that need replacing | |
| Fire damage at the rear of the building that needs to be scraped and painted. | |
| Rear bedroom that is boarded over needs to be replace. | |
| Prune the trees over the roof. | |
| Kitchen: The floor at the rear entrance is water damaged, with a building permit, replace the water damaged flooring and sub-floor. | |
| Replace the rear exterior door and lock set. | |
| Repair the south wall where there is exposed wiring. | |
| The water heater is deteriorated and needs to be replace, obtain plumbing permit for the repair. | |
| Hall: Install smoke alarm. | |
| The gas wall heater is damaged, with mechanical permit replace the wall heater. | |
| Bathroom: The shower shows water damage, with building permit replace the shower enclosure. | |

THE 1991 UNIFORM BUILDING CODE (SECTION 1210) REQUIRES OWNERS OF RESIDENTIAL DWELLINGS TO INSTALL SMOKE DETECTORS WHENEVER A BUILDING PERMIT IS ISSUED FOR ADDITIONS, ALTERATIONS OR REPAIRS WHEN THE VALUATION OF THE WORK EXCEEDS \$1,000. THEREFORE, SMOKE DETECTORS (WHERE NOT EXISTING) MUST BE INSTALLED IN EACH SLEEPING ROOM AND AT A POINT CENTRALLY LOCATED IN THE CORRIDOR OR AREA GIVING ACCESS TO EACH SLEEPING AREA.

TYPE OF VIOLATION/CORRECTION

DATE CLEARED

The bathroom floor is water damaged, with building permit
replace the flooring.

Interior: Remove all debris causing a fire hazard.

The well to the building is not connected, this renders the
building uninhabitable, water and sewer must be connected to
public services. The building official will not allow the
well to ^{be} used for potable water.

Re: 25906 Gading Road

Dear Mr. Wilson:

NOTICE AND ORDER

It has been brought to our attention that the dwelling located at 25906 Gading Road is not equipped with any running water.

The Uniform Building Code, Section 1205 (d) Sanitation, requires that every dwelling unit be provided with hot and cold running water. This is in violation of Hayward Municipal Code, Chapter 9, Article 3, Section 9-3.302. The structure is therefore substandard and inhabitable.

This is a "Notice and Order" for you to either vacate the unit and properly secure it or obtain the proper permits and inspections in order to provide running water to the unit. Compliance with this notice must be done within fifteen (15) days of receipt of this letter.

If you have any questions, please call me at 293-5284.

Sincerely,

Carlos Baltodano
Building Official

CITY OF HAYWARD
DEPARTMENT OF COMMUNITY AND ECONOMIC DEVELOPMENT
Building Inspection Division

June 23, 1993

TO: Director of Community & Economic Development
FROM: Assistant Building official (62)
SUBJECT: 25906 Gading Road

On Saturday, June 12, 1993, the Assistant building official responded to a call from the Hayward Police Department Emergency Response Unit to view an accident site at the above address for hazardous code violations.

Upon arrival, I found that a young boy had been electrocuted by loose wires supplying power to a deep well pump located on the rear portion of the property. The wires were #12 copper and in the main were bare, as the insulation had rotted and fallen off. Due to improper support poles, the wires had drooped to less than 4' from the ground in the area of the accident.

Pacific Gas & Electric cut the wires (2) off at their exposed source under the eaves of the garage/porch structure located near the front of the site. Testing revealed them to be carrying 240 volts at 40 amps. No ground wire was supplied.

The power source structure was in an abandoned condition in that the windows were broken out though partially blocked by stored items. At the rear were a great amount of rotting garbage and auto parts.

On Monday morning, June 21, 1993, the Assistant building official, the Senior Building Inspector/Structural, and the Senior Building Inspector/Electrical, met Hayward Police Officer David Gant in an attempt to gain access into the garage structure. We were unable to locate either of the owners, Mr. M. Wilson, Jr. or Jean Wilson, brother and sister. An unidentified man who answered the police officer's knock claimed he did not know where they might be working.

Community Preservation was contacted and requested to visit the site in order to facilitate cleaning up the garbage.

This structure should be posted for repair or demolition under the abatement process.

Attached are the notes of the Senior Inspectors and a sketch giving the lot layout. If you have any questions, please call.

Director of Community & Economic Development
June 23, 1993
Page Two

Notes from Larry Hulse, Sr. Building Inspector/Structural

On June 21, 1993, at 9:30 am, Emmett Forreth, Assistant Building Official, Bob Walsh, Sr. Electrical Inspector, and Larry Hulse, Sr. Building Inspector/Structural met with David Sand of the Hayward Police Department at the above site. The purpose of this meeting was to perform field observations and how they related to Police Report #8714238.

Upon arrival at the above site, we observed the following:

1. The electrical overhead service to a well pump located at the rear of the property was disconnected and the only wiring suspended between power poles existed between poles # (g) & (h), see attached diagram.
2. Said wires are approximately 7'-6" from grade.
3. The origin of the electrical supply started at the detached garage, "c" on attached diagram.
4. The conductors had been disconnected from their supply and now lay on the ground.
5. There were no overhead wires noted on this date between pole #e#, #f# or #g# on attached diagram.
6. The wiring observed on the ground in these areas appeared to have lost its insulation over the years because of exposure to the elements. Someone had partially installed electrical tape over the exposed conductors in the past. It is unknown when this took place.

Upon return to the office, I researched the files on the property. Our records indicate the following:

- 6-21-93 Legal owners listed as of this date are Will M. Jr. & Vera Wilson - 22506 Gading Road, Hayward, CA.
- 10-23-87 Willis Wilson applied for an electrical permit (#25684) for one receptacle, voltage unknown.
- 10-25-87 through 2-4-90 Mr. Wilson never requested any inspections.
- 2-5-90 Mr. Wilson was sent a notice of pending cancellation of the permit because there were no inspections within the required time frame.

Director of Community & Economic Development
June 23, 1993
Page Three

2-22-90 Mr. Wilson did not respond to the notice sent on 2-9-90,
therefore the electrical permit (#99684) was cancelled.

There are no records beyond this point listed in the Building
Inspection Division office; however Community Preservation has
records as late as 2-7-93.

Notes from Bob Walsh, Sr. Electrical Inspector

I was assigned to inspect an overhead branch circuit feeding a one horsepower pump, 230 Volts, single phase motor, in a field behind the above referenced address. No. 12 AWG copper conductors were spanned from the garage structure over three poles for approximately 120 feet. The last 85 feet of span remained clearing the ground by approximately 7 feet. The conductor's insulation had completely deteriorated over approximately 65 percent of the length. At one time, thermoplastic electrical insulating tape was wrapped around various areas of the conductor's length, however, the remaining tape had deteriorated to the point of unraveling and was corroded and locked in the closed (unraveled) position. Ground cable was installed between the disconnect and the pump motor without protection from the disconnect. The motor was protected from overload by a 30 amp and a 25 amp fuses.

I was unable to trace the supply conductor to the distribution panel board because the interiors of the dwelling and associated structures were not accessible.

SPACES ABOVE THIS LINE FOR RECORDER'S USE

DEED OF TRUST

THIS DEED OF TRUST is made April 26, 1992, among the Trustor, William M. Wilson Jr., individually and as an heir to the Estate of Bertha Jean Wilson, deceased (herein "Borrower"), Trustco, Inc. (herein "Trustee"), and the Beneficiary, National Consumers Finance Company, a corporation organized and existing under the laws of California, whose address is 11111 W. Olympic Blvd., Los Angeles, California, 90064 (herein "Lender").

BORROWER, in consideration of the indebtedness herein recited and the trust herein created, irrevocably grants and conveys to the Trustee, in trust, with power of sale, the following described property located in the County(ies) of Alameda, State of California:

See attached legal description.

which has the address of:

Parcel # 25566 Gading Road, Hayward, CA 94544
(herein "Property Address")

TOGETHER with all the improvements now or hereafter erected on the property, and all easements, rights, appurtenances and renewals thereof (herein "Note"), in the principal sum of U.S. \$150,000.00, with interest thereon, providing for monthly installments of principal and interest, with the balance of the indebtedness, if not sooner paid, due and payable on June 1, 2002; the payment of all other sums with performance of the covenants and agreements of Borrower herein contained.

Borrower covenants that Borrower is lawfully seized of the estate hereby conveyed and has the right to grant and convey the Property, and that the Property is unencumbered except for encumbrances of record. Borrower covenants that Borrower warrants and will defend generally the title to the Property against all claims and demands, subject to encumbrances of record.

UNIFORM COVENANTS. Borrower and Lender covenant and agree as follows:
1. Payment of Principal and Interest. Borrower shall promptly pay when due the principal and interest indebtedness evidenced by the Note and late charges as provided in the Note.

2. Funds for Taxes and Insurance. Subject to applicant's law or a written waiver by Lender, Borrower shall pay to Lender on the day monthly payments of principal and interest are payable under the Note, until the Note is paid in full, a sum (herein "Funds") equal to one-twelfth of the yearly taxes and assessments (including condominium and planned unit development assessments, if any) which may obtain and ground rents on the Property; if any, plus one-twelfth of yearly premium installments for hazard insurance, plus one-twelfth of yearly premium installments for mortgage assessments and bills and reasonable estimates thereof. Borrower shall not be obligated to make such payments of Funds to Lender to the extent that Borrower makes such payments to the holder of a prior mortgage or deed of trust if such holder is an Institutional Lender.

If Borrower pays Funds to Lender, the Funds shall be held in an institution the deposits or accounts of which are insured or guaranteed by a Federal or state agency (including Lender if Lender is such an institution). Lender shall apply the Funds to pay said taxes, assessments, insurance premiums and ground rents. Lender may not charge for so holding and applying the Funds, analyzing said account or verifying applicable law permits Lender to make such a charge. Borrower and Lender may agree in writing at the time of execution of this Deed of Trust that interest on the Funds shall be paid to Borrower, and unless such agreement is made or applicable law requires such interest to be paid, Lender shall not be required to pay Borrower any interest or earnings on the Funds. Lender shall give to Borrower, without charge, an annual accounting of the Funds showing credits and debits to the Funds and the purposes for which the same were made. The Funds are pledged as additional security for the sums covered by this Deed of Trust.

[84639 / William M. Wilson Jr.]

92163960

19. Assignment of Rents Appointment of Receiver Lender in Possession. As additional security hereunder, Borrower hereby assigns to Lender the rents of the Property, provided that Borrower shall prior to accelerating under paragraph 17 hereof or abandonment of the Property, have the right to collect and retain such rents as they become due and payable.

Upon acceleration under paragraph 17 hereof or abandonment of the Property, Lender, in person, by agent or by judicially appointed receiver, shall be entitled to enter upon, take possession of and manage the Property and to collect the rents of the Property including those past due. All rents collected by Lender or the receiver shall be applied first to payment of the costs of management of the Property and collection of rents, including, but not limited to, receiver's fees, premiums on receiver's bonds and reasonable attorney's fees, and then to the sums secured by this Deed of Trust. Lender and the receiver shall be liable to account only for those rents actually received.

20. Reconveyance. Upon payment of all sums secured by this Deed of Trust, Lender shall request Trustee to reconvey the Property and shall surrender this Deed of Trust and all notes evidencing indebtedness secured by this Deed of Trust to Trustee. Trustee shall reconvey the Property without warranty to the person or persons legally entitled thereto. Such person or persons shall pay all costs of recordation, if any.

21. Substitute Trustee. Lender, at Lender's option, may from time to time appoint a successor trustee to any Trustee appointed hereunder by an instrument executed and acknowledged by Lender and recorded in the office of the Recorder of the county where the Property is located. The instrument shall contain the name of the original Lender, Trustee and Borrower, the book and page where this instrument is recorded and the name and address of the successor trustee. The successor trustee shall, without conveyance of the Property, succeed to all the title, powers and duties conferred upon the Trustee herein and by applicable law. This procedure for substitution of trustee shall govern to the exclusion of all other provisions for substitution.

22. Request for Notices. Borrower requests that copies of the notice of default and notice of sale be sent to Borrower's address which is the Property Address. Lender requests that copies of notices of foreclosure from the holder of any lien which has priority over this Deed of Trust be sent to Lender's address as set forth on page one of this Deed of Trust, as provided by Section 2924(b) of the Civil Code of California.

23. Statement of Obligation. Lender may collect a fee not to exceed the maximum amount permitted by law for furnishing the statement of obligation as provided by Section 2943 of the Civil Code of California.

REQUEST FOR NOTICE OF DEFAULT AND FORECLOSURE UNDER SUPERIOR MORTGAGES OR DEEDS OF TRUST

Borrower and Lender request the holder of any mortgage, deed of trust or other encumbrance with a lien which has priority over this Deed of Trust to give Notice to Lender, at Lender's address set forth on page one of this Deed of Trust, of any default under the superior encumbrance and of any sale or other foreclosure action.

IN WITNESS WHEREOF, Borrower has executed this Deed of Trust.

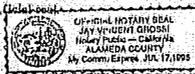

William M. Wilson Jr.
William M. Wilson Jr.
April 20, 1992

STATE OF CALIFORNIA, County of Los Angeles ss:

On April 23, 1992, before me, Jay Vincent Gault
(here insert name and title of the officer), Notary Public, personally appeared

William M. Wilson Jr.
personally known to me (or proved to me on the basis of satisfactory evidence) to be the person(s) whose name(s) is/are subscribed to the within instrument and acknowledged to me that he/she/they executed the same in his/her/their authorized capacity(ies), and that by his/her/their signature(s) on the instrument the person(s), or the entity upon behalf of which the person(s) acted, executed the instrument.

WITNESS my hand

Jay Vincent Gault
Signature

REQUEST FOR RECONVEYANCE

TO TRUSTEE:
The undersigned is the holder of the note or notes secured by this Deed of Trust. Said note or notes, together with all other indebtedness secured by this Deed of Trust, have been paid in full. You are hereby directed to cancel said note or notes and this Deed of Trust, which are delivered hereby, and to reconvey, without warranty, all the estate now held by you under this Deed of Trust to the person or persons legally entitled thereto.

Dated:

[54632 / William M. Wilson Jr.]

Hayward, CA 94544

Re: 25906 Gading Road

Dear Mr. Havlik:

The purpose of this letter is to confirm our discussion of February 16, 1994 in which I agreed and you accepted the extension until March 1, 1994 of the "Notice and Order" to vacate the above referenced property.

As I indicated, City of Hayward is willing to work with you and your clients to assure a smooth transition to an alternative housing site.

Please be advised that this is the last extension I will provide on this property.

Sincerely,

A handwritten signature in cursive script, appearing to read "Carlos Baltodano".

Garage

9'4" x 7'2" large garage door
3 sheets @ 4'2" x 4'3" windows
3'6" x 7' rear entry door

House

The following dimensions are taken starting from the back door and moving around the house counterclockwise.

3'9" x 7'6" rear entry door
3'5" x 3'6"
7' x 4'5" rear Living room window
3'5" x 3'6" rear bathroom window
7' x 4'5" rear corner bedroom window
2 sheets @ 4'5" x 4'6" bedroom windows at the left side of the building
5 sheets @ 4'7" x 3'2" along the front of building and one window at the front right side
4' x 7'8" main entry at the front of the building
Please include three (3) additional sheets of plywood for a couple other windows that were not accessible for measuring.

Use 1/2" plywood with 16D nails for boarding over the openings.

I have tentatively scheduled Thursday February 17, for the day to board over the structure. At least one Police Officer will be at the site during the work.

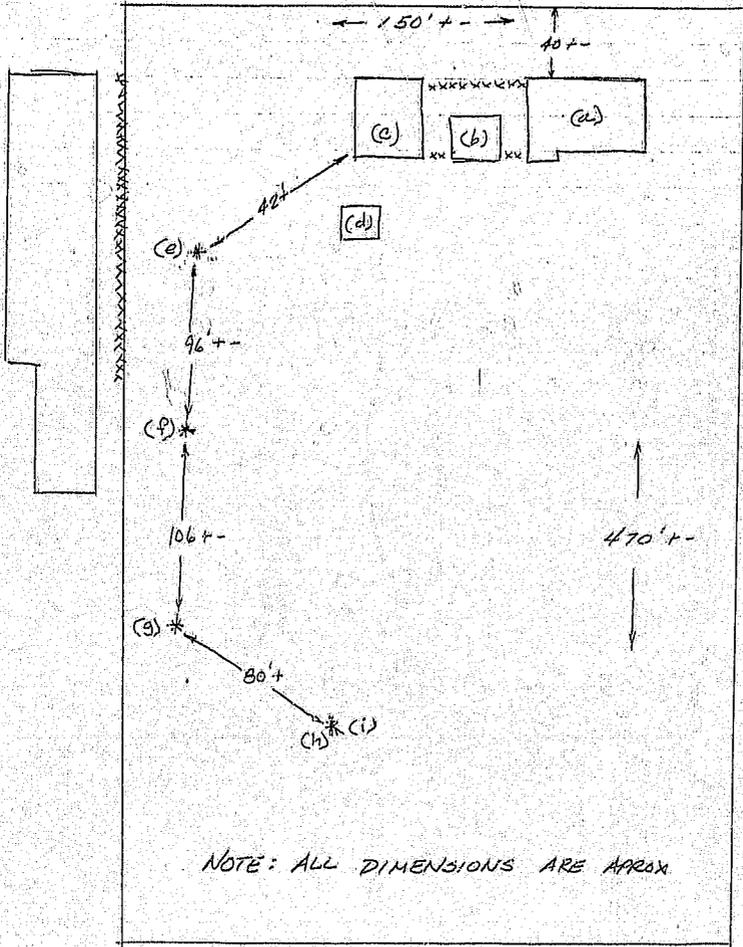

Please wait until I give the go ahead for buying the materials as I am currently working together with the owners attorney.

If you have questions, please call me at 293-5443

Re: 25906 Gading Road - Change of Occupancy Survey

Dear Mr. Marchand:

On May 16, 1996, a survey of the above property was performed by Jack Ervin, Sr. Plumbing-Mechanical Inspector, Bob Walsh, Sr. Electrical Inspector and myself. The purpose of this survey was to observe the structures in their present state and note what would be required in order to change the occupancy classification.

There are two structures on the property presently, one is a single family dwelling (classified as R-3) and a private detached garage (classified as M-1). You wish to change the occupancy into a fellowship lodge for social or religious functions, which carries the occupancy classification of Group A Division 3. Our findings are as follows:

Description

Single family one story dwelling of type VN construction.

Exterior finish of woodboard/batt and with wood sash.

Interior finish of knotty pine.

The original structure consisted of two bedroom, one bath, living room, kitchen and front porch. A second permit was taken out later to enclose the front porch and create two additional bedrooms.

Detached garage, one story with laundry room of type VN construction.

Both structures are in a deteriorated state, exterior doors and windows were broken out or boarded shut. The interiors have been destroyed in part, fixtures and/or appliances removed. Roof damage was also noted. No heat or running water.

Neither of the structures is habitable.

25906 GADING ROAD
SAN RAMON, CA 94583

Dan Marhand
May 30, 1996
Page 2

Building

1. Required handicapped or other parking not provided.
-See site listing.
2. Required handicapped accessible entry not provided.
-Provide handicapped access via ramp, landing, 3 foot wide door with lever hardware and proper landing, strike side clearances. Logo at front entry per code.
3. Required handicapped accessibility throughout the interior of the structure not provided.
-All floor levels throughout the structure shall not exceed 1/2" change in elevation.
-All doors shall be increased to a minimum 3 foot wide doorways (32" clear width).
-All hallways, (if any), shall be widened to a minimum of 44".
4. Required handicapped accessible restroom not provided. (Original restroom will not comply).
-Remove original restroom facilities, enlarge, alter and remodel as necessary in order to create one new fully handicapped accessible restroom per code.
5. Required assistive listening system not installed.
-Install same per code.
6. Required egress not acceptable.
-Two egress locations are required and they shall be accessible by handicapped persons. The entry, once constructed for handicapped access, would comply however, the rear exit through the kitchen is not allowed by code.
-A second exit/egress shall be provided out the rear of the structure that does not go through rooms such as kitchens or store rooms and shall be designed for handicapped, per code.
7. Required floor loads inadequate for use.
-Structural engineer to provide calculations and design for increased floor loading.
8. Repairs required throughout
 - a) Exterior underfloor vents not installed and/or not screened per code.
-Install same.
 - b) Underfloor access door missing and below grade.
-Install door. Create concrete formed well so that exterior surface water does not flood under structure.
 - c) Exterior of structure not weather tight.
-Remove/repair all doors, windows, and/or holes through exterior and seal as necessary.
 - d) Exterior roof covering and structural elements show need for replacement and/or repair.
-Repair as necessary per code.

0

Dan Marchand
May 30, 1996
Page 3

- e) Holes noted in floor in interior of structure from prior fire damage.
-Repair as necessary per code (see item #7 above).
- f) Kitchen gutted of all appliances and/or other.
-Repair as necessary per code. Note: Kitchen shall comply for handicapped accessibility, i.e., appliances, work stations, sink, lever controls, low counters, etc.

Detached garage/laundry

The structure was not fully accessible at time of survey, however, we observed the following through an open window.

1. Structure in need of repair throughout.
-Repair as necessary per code.
2. Illegal bathroom and/or other constructed in garage.
-Remove same and restore to garage.

Electrical

1. The connection of the structure's electrical service grounding electrode conductor to the grounding electrode is not accessible.
- Locate the connection for inspection.
2. Lighting fixtures are broken and missing throughout the structure.
- Install lighting fixtures at each outlet provided and replace broken lighting fixtures.
3. The attic was not accessible for inspection.
- Provide means to access the attic for inspection.
4. The detached garage has light fixtures missing and wiring exposed to physical damage.
- The wiring methods in the detached garage shall be renovated.
5. The detached garage does not have a grounding electrode.
- Install a grounding electrode at the detached garage and bond the branch circuits equipment grounding conductors to the electrode.
5. The feeder from the service to the distribution panel is too small for a 50 ampere circuit breaker.
- Either lower the circuit breaker to 40 amperes or install #6 AWG copper feeders.
6. The nonmetallic-sheathed cable has limited use in a place of assembly.
- The nonmetallic-sheathed cable can remain in those portions of the structure that are not required to be fire-rated construction by the applicable building code. Typically, the fixed wiring methods for Places of Assembly shall be metal raceways, nonmetallic raceways encased in not less than 2 inches of concrete, Type MI cable, or Type MC cable.

500-1-1-4

Dan Marchand
May 30, 1996
Page 4

Plumbing/Mechanical

1. Required water service not provided.
-Apply for and receive new City water service supply and meter (based on number of fixture units the structure will have).
2. Required handicapped restroom not provided.
-Provide same with approved fixtures per code.
3. Inadequate plumbing supply and waste system.
-Remove all undersized/illegal and/or exposed piping and install all new per code. All piping shall be installed within walls.
4. If kitchen is to be redone,
-Install commercial range hood with approved fire rated shaft per code. (Variance may be granted to this requirement).
-Install handicapped accessible fixtures, etc.

Site

1. Required paved parking area not provided.
-Contact Planning/Zoning for minimum number of parking stalls for your use.
2. Required (van size) handicapped parking stall not provided.
-Provide same adjacent to primary entry with proper signage at driveway, parking stall, etc., per code.
3. Required site drainage plan not provided.
-Provide same because lot grade below street grade.

Permits Required

Building

Interior remodel/repairs.

Electrical

For new circuit installation and any additions to existing circuitry.

Plumbing

New water service.
New plumbing system both supply and waste.

Mechanical

New mechanical ventilation system.
New equipment, i.e., commercial range hood.

00-1-42

Dan Marchant
May 30, 1996
Page 5

Water Department
New water service and meter.

Please contact other City department or divisions for their input, i.e., Fire, Planning/Zoning, etc. Also please contract with the appropriate engineer and architect for design plans.

As with any survey of this nature there may have been some items missed. However, these will be addressed during either the plan check process or field inspections. If necessary, an amended report will be provided.

Once all corrective work is permitted, inspected and approved a new Certificate of Occupancy will be issued. If you have any questions, please free to call me at 293-5425.

Sincerely,

Larry Hulse
Sr. Building Inspector

PERMIT

PERMIT NO: BI-2009-1633

TYPE: Demolition Permit

DATE: 6/1/2009

JOB ADDRESS: 25906 GADING RD

OWNER: COMMUNITY CHRISTIAN FILIPINO
PO BOX 56507
HAYWARD CA 94545-8507

CONTRACTOR: BRIDGES CONSTRUCTION
PO BOX 628
SAN LORENZO CA 94580
(510) 760-4725
ST LICENSE NO: 138471
BUS LICENSE NO: 871828

CONTRACTOR

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Sec. 7000) of Div. 3 of the Business and Professions Code (B. & P.C.), and my license is in full force and effect.

I hereby affirm under penalty of perjury that I am exempt from the Contractor's License Law for the following reason: Sec. 7031.5, B. & P.C.: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Sec. 7000) of Div. 3 of the B. & P.C.) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violations of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

OWNER/BUILDER

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044 B. & P.C.: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work themselves or through their own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement(s) is sold within one year of completion, the owner-builder will have the burden of proving that they did not build or improve for the purpose of sale).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P.C.: The Contractor's License Law does not apply to an owner of the property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractor's License Law).

I am exempt under Sec. _____ B & P.C.
For this reason _____

I hereby affirm under penalty of perjury one of the following declarations: I have and will maintain a certificate of consent to self-insure for workers' compensation as provided for by Sec. 3700 of the Labor Code or have and will maintain workers' compensation insurance as required by Section 3700 of the Labor Code for the performance of the work for which this permit is issued.

POLICY NO _____
CARRIER _____

(This section need not be completed if the permit is for one hundred dollars (\$100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the Workers' Compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3708 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Site Plan for Demo Permit

**CITY OF HAYWARD
DEVELOPMENT SERVICES DEPARTMENT
OFFICE OF THE BUILDING OFFICIAL**

**Exhibit A
Page 4 of 5**

**25906 Gading Road
Hayward, CA
APN: 453-0005-063-02**

If demolition has not been completed within thirty days from the date of service, the work specified in the Notice may be done or caused to be done by the Building Official and the cost levied as a special assessment against the property.

Furthermore, if compliance with the Building Official's order is not achieved within the time specified therein, and no appeal has been properly and timely filed, or an appeal has been filed but determined by the Building Abatement Appeals Board adversely to the appellant, the Building Official shall file in the Office of the Records of the County of Alameda a certificate describing the property and certifying that the building is an unsafe, substandard, and dangerous building and that the owner has been notified. (Hayward Municipal Code Section 9-3.403 Recordation)

Should you have any questions or concerns regarding the above, please call Glen Martinez at (510) 583-4159.

**CITY OF HAYWARD
DEVELOPMENT SERVICES DEPARTMENT
OFFICE OF THE BUILDING OFFICIAL**

**NOTICE AND ORDER
TO DEMOLISH BUILDING
OR STRUCTURE
PURSUANT TO SECTION 9-3.405**

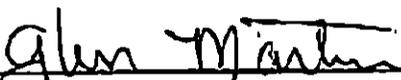

In accordance with Section 9-3.302, Article 3, Chapter 9 of the Hayward Municipal Code, this is official notice that the building or structure, or portion thereof, located on the following real property situated in the City of Hayward, County of Alameda, State of California, commonly designated as 25906 Gading Road Hayward, California, and described as Parcel 63-2, Block 5 Map Book 453, in the records of the Alameda County Assessor, and more particularly described on the attached description, is unsafe, substandard, and dangerous for the reasons described in Exhibit A attached hereto and incorporated herein by reference and shall be demolished within thirty (30) calendar days from the date of service of this Notice and Order.

If the demolition and removal are not completed within the time specified, or within such extension of time as may be granted by the Building Official, a Notice of Violation on this property will be filed with the Alameda County Recorder.

Any person having any beneficial or legal interest may appeal the Notice and Order or any action of the Building Official within ten (10) calendar days from the date of service of this Notice, providing the appeal is made in writing and filed with the Building Official. Failure to appeal as provided in this code shall constitute a waiver of all right to an administrative hearing and determination of the matter and will waive all right to maintain any action, suit, or proceeding to set aside or modify the Building Official's notice, order and action.

DATE OF NOTICE: February 3, 2009

APPROVED BY:

Glen Martinez, Acting Building Official

**CITY OF HAYWARD
DEVELOPMENT SERVICES DEPARTMENT
OFFICE OF THE BUILDING OFFICIAL**

**Exhibit A
Page 1 of 5**

**25906 Gading Road
Hayward, CA
APN: 453-0005-063-02**

The property at 25906 Gading Road is deemed to be unsafe, substandard and dangerous pursuant to Chapter 9, Article 3, Section 9 of the Hayward Municipal Code. Conditions exist to the extent that the life, health, property or safety of the public or its occupants is endangered.

UNSAFE, SUBSTANDARD, AND DANGEROUS BUILDING (Section 9-3.302 (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n), (o), (p), and (q)):

For the purpose of this code, any building or structure which has any or all of the conditions or defects hereinafter described shall be deemed to be a public nuisance and an unsafe, substandard, and dangerous building, provided that such conditions or defects exist to the extent that the life, health, property, or safety of the public or its occupants are endangered.

- b. Whenever the stress in any materials, member or portion thereof, due to all dead and live loads, is more than one and one-half times the working stress or stresses allowed in the Hayward Building Code, for new buildings of similar structure, purpose, or location.
- c. Whenever any portion thereof has been damaged by fire, earthquake, wind, flood, or by any other cause, to such an extent that the structural strength or stability thereof is materially less than it was before such catastrophe and is less than the minimum requirements of the Hayward Building Code, for new buildings of similar structure, purpose or location.
- d. Whenever any portion or member or appurtenance thereof is likely to fail, or to become detached or dislodged, or to collapse and thereby injure persons or damage property.
- e. Whenever any portion of a building, or any member, appurtenance, or ornamentation on the exterior thereof is not of sufficient strength or stability, or is not so anchored, attached, or fastened in place so as to be capable of resisting a wind pressure of one-half of that specified in said Hayward Building Code, for new buildings of similar structure, purpose, or location without exceeding the working stresses permitted in said Hayward Building Code for such buildings.
- f. Whenever any portion thereof has wracked, warped, buckled, or settled to such an extent that walls or other structural portions have materially less resistance to winds or earthquakes than is required in the case of similar new construction.

- g. Whenever the building or structure, or any portion thereof, because of:
- (1) dilapidation, deterioration, or decay;
 - (2) faulty construction;
 - (3) the removal, movement, or instability of any portion of the ground necessary for the purpose of supporting such building;
 - (4) the deterioration, decay, or inadequacy of its foundation; or
 - (5) any other cause
- is likely to partially or completely collapse.
- h. Whenever, for any reason, the building or structure, or any portion thereof, is manifestly unsafe for the purpose for which it is being used.
- i. Whenever the exterior walls or other vertical structural members list, lean, or buckle to such an extent that a plumb line passing through the center of gravity does not fall inside the middle one-third of the base.
- j. Whenever the building or structure, exclusive of the foundation shows 33 percent or more damage or deterioration of its supporting member or members, or 50 percent damage or deterioration of its nonsupporting members, enclosing or outside walls or coverings.
- k. Whenever the building or structure has been so damaged by fire, wind, earthquake or flood, or has become so dilapidated or deteriorated as to become:
- (1) an attractive nuisance to children;
 - (2) a harbor for vagrants, criminals, or immoral persons; or
 - (3) as to enable persons to resort thereto for the purpose of committing unlawful or immoral acts.

**CITY OF HAYWARD
DEVELOPMENT SERVICES DEPARTMENT
OFFICE OF THE BUILDING OFFICIAL**

**Exhibit A
Page 3 of 5**

**25906 Gading Road
Hayward, CA
APN: 453-0005-063-02**

- l. Whenever any building or structure has been constructed, or exists or is maintained in violation of any specific requirement or prohibition applicable to such building or structure provided by the building regulations of this City, as specified in the Hayward Building Code, or Hayward Housing Code, or of any law or ordinance of this state or the City of Hayward relating to the condition, location, or structure of buildings.
- m. Whenever any building or structure which, whether or not erected in accordance with all applicable laws and ordinances, has in any nonsupporting part, member or portion, less than 50 percent, or in any supporting part, member, or portion less than 66 percent of the (1) strength, (2) fire-resisting qualities or characteristics, or (3) weather-resisting qualities or characteristics required by law in the case of a newly constructed building of like area, height, and occupancy in the same location.
- n. Whenever a building or structure, used or intended to be used for dwelling purposes, because of inadequate maintenance, dilapidation, decay, damage, faulty construction, or arrangement, inadequate light, air, or sanitation facilities, or otherwise, is determined by the County Health Officer to be unsanitary, unfit for human habitation, or in such a condition that is likely to cause sickness or disease.
- o. Whenever any building or structure, because of obsolescence, dilapidated condition, deterioration, damage, inadequate exits, lack of sufficient fire-resistive construction, faulty electric wiring, gas connections or heating apparatus, or other cause, is determined by the Fire Marshal to be a fire hazard.
- p. Whenever any building or structure is in such a condition as to constitute a public nuisance known to the common law or in equity jurisprudence.
- q. Whenever any portion of a building or structure remains on a site after the demolition or destruction of the building or structure, or whenever any building or structure is abandoned for a period in excess of six months, so as to constitute such building or portion thereof an attractive nuisance or hazard to the public.

Violation: Structure fire-damaged, deteriorated and a harbor for vagrants.

Action Required: Demolish structure

- l. Whenever any building or structure has been constructed, or exists or is maintained in violation of any specific requirement or prohibition applicable to such building or structure provided by the building regulations of this City, as specified in the Hayward Building Code, or Hayward Housing Code, or of any law or ordinance of this state or the City of Hayward relating to the condition, location, or structure of buildings.
- m. Whenever any building or structure which, whether or not erected in accordance with all applicable laws and ordinances, has in any nonsupporting part, member or portion, less than 50 percent, or in any supporting part, member, or portion less than 66 percent of the (1) strength, (2) fire-resisting qualities or characteristics, or (3) weather-resisting qualities or characteristics required by law in the case of a newly constructed building of like area, height, and occupancy in the same location.
- n. Whenever a building or structure, used or intended to be used for dwelling purposes, because of inadequate maintenance, dilapidation, decay, damage, faulty construction, or arrangement, inadequate light, air, or sanitation facilities, or otherwise, is determined by the County Health Officer to be unsanitary, unfit for human habitation, or in such a condition that is likely to cause sickness or disease.
- o. Whenever any building or structure, because of obsolescence, dilapidated condition, deterioration, damage, inadequate exits, lack of sufficient fire-resistive construction, faulty electric wiring, gas connections or heating apparatus, or other cause, is determined by the Fire Marshal to be a fire hazard.
- p. Whenever any building or structure is in such a condition as to constitute a public nuisance known to the common law or in equity jurisprudence.
- q. Whenever any portion of a building or structure remains on a site after the demolition or destruction of the building or structure, or whenever any building or structure is abandoned for a period in excess of six months, so as to constitute such building or portion thereof an attractive nuisance or hazard to the public.

Violation: Structure fire-damaged, deteriorated and a harbor for vagrants.

Action Required: Demolish structure

DEED OF TRUST WITH ASSIGNMENT OF RENTS

THIS DEED OF TRUST, this 3rd day of July 2003, between **FILIPINO COMMUNITY CHRISTIAN CHURCH**, a non-profit organization, located at 25906 Gading Road, Hayward, California 94544, herein called "Trustor". **CHICAGO TITLE COMPANY**, with a mailing address of One Kalher Plaza, Suite 745, Oakland, California 94612, herein called "Trustee" and **BAPTIST GENERAL CONFERENCE CORNERSTONE FUND**, an Illinois not-for-profit corporation, whose address is 2002 S. Arlington Heights Road, Arlington Heights, Illinois, herein called "Beneficiary". Trustor irrevocably grants, transfers and assigns to Trustee in Trust, with Power of Sale that property in the City of Hollister, County of Alameda, State of California, described as follows:

See Exhibit A attached hereto and made a part hereof

Together with the rents, issues and profits thereof, subject, however, to the right, power and authority hereinafter given to and conferred upon Beneficiary to collect and apply such rents, issues and profits.

For the Purpose of Securing (1) payment of the sum of \$222,200.00 with interest thereon according to the terms of a promissory note of even date herewith made by Trustor, payable to order of Beneficiary, and extensions or renewals thereof; (2) the performance of each agreement of Trustor incorporated by reference or contained herein or reciting it is so secured; (3) Payment of additional sums and interest thereon which may hereafter be loaned to Trustor, or his successors or assigns, when evidenced by a promissory note or notes reciting that they are secured by this Deed of Trust.

To protect the security of this Deed of Trust, and with respect to the property above described, Trustor expressly makes each and all of the agreements, and adopts and agrees to perform and be bound by each and all of the terms and provisions set forth in subdivision A of that certain Fictitious Deed of Trust referenced herein, and it is mutually agreed that all of the provisions set forth in subdivision B of that certain Fictitious Deed of Trust recorded in the book and page of Official Records in the office of the county recorder of the county where said property is located, noted below opposite the name of such county, namely:

| COUNTY | BOOK | PAGE | COUNTY | BOOK | PAGE | COUNTY | BOOK | PAGE | COUNTY | BOOK | PAGE |

Shall inure to and bind the parties herein, with respect to the property above described. Said agreements, terms and provisions contained in said subdivisions A and B. (Identical in all counties, and printed on the reverse side hereof) are by the within reference thereto, incorporated herein and made a part of this Deed of Trust for all purposes as fully as if set forth at length herein, and Beneficiary may charge for a statement regarding the obligation secured hereby, provided the charge therefor does not exceed the maximum allowed by law.

The undersigned Trustor, requests that a copy of any notice of default and any notice of sale hereunder be mailed to him at this address hereinbefore set forth.

DO NOT RECORD

The following is a copy of Subdivisions A and B of the fictitious Deed of Trust recorded in each county in California as stated in the foregoing Deed of Trust and incorporated by reference in said Deed of Trust as being a part thereof as if set forth at length therein.

A. TO PROTECT THE SECURITY OF THIS DEED OF TRUST, TRUSTOR AGREES:

- (1) To keep said property in good condition and repair; not to remove or demolish any building thereon; to complete or restore promptly and in good and workmanlike manner any building which may be constructed, damaged or destroyed thereon and to pay when due all claims for labor performed and materials furnished therefor; to comply with all laws affecting said property or requiring any alterations or improvements to be made thereon; not to commit or permit waste thereof; shall not commit, suffer or permit any act upon said property in violation of law; to cultivate, irrigate, fertilize, fumigate, prune and do all other acts which from the character or use of said property may be reasonably necessary, the specific enumerations herein not excluding the general.
- (2) To provide maintain and deliver to Beneficiary fire insurance satisfactory to and with loss payable to Beneficiary. The amount collected under any fire or other insurance policy may be applied by Beneficiary upon any indebtedness secured hereby and in such order as beneficiary may determine, or at option of Beneficiary the entire amount so collected or any part thereof may be released to Trustor. Such application or release shall not cure or waive any default or notice of default hereunder or invalidate any act done pursuant to such notice.
- (3) To appear in and defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; and to pay all costs and expenses, including cost of evidence of title and attorney's fees in a reasonable sum, in any action or proceeding in which Beneficiary or Trustee may appear, and in any suit brought by Beneficiary to foreclose this Deed.
- (4) To pay at least ten days before delinquency all taxes and assessments affecting said property, including assessments on appurtenant water stock; when due, all encumbrances, charges and liens, with interest, on said property or any part thereof, which appear to be prior to superior hereto; all costs, fees and expenses of this Trust.
Should Trustor fail to make any payment or to do any act as herein provided, then the Beneficiary or Trustee, but without obligation so to do and without notice to or demand upon Trustor and without releasing Trustor from any obligation hereof, may; make or do the same in such manner and to such extent as either may deem necessary to protect the security hereof, Beneficiary or Trustee being authorized to enter upon said property for such purposes; appear in and defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; pay, purchase, correct or compromise any encumbrance, charge or lien which in the judgment of either appears to be prior or superior hereto; and, in exercising any such powers, pay necessary expenses, employ counsel and pay his reasonable fees.
- (5) To pay immediately and without demand all sums so expended by Beneficiary or Trustee, with interest from date of expenditure at the amount allowed by law in effect at the date hereof, and to pay for any statement provided for by law in effect at the date hereof regarding the obligations secured hereby any amount demanded by the Beneficiary not to exceed the maximum allowed by law at the time when said statement is demanded

IT IS MUTUALLY AGREED:

- (1) That any award of damages in connection with any condemnation for public use of or injury to said property or any part thereof is hereby assigned and shall be paid to Beneficiary who may apply or release such moneys received by him in the same manner and with the same effect as above provided for disposition of proceeds of fire or other insurance.
- (2) That by accepting payment of any sum secured hereby after its due date, Beneficiary does not waive his right either to require prompt payment when due of all other sums so secured or to declare default for failure so to pay.
- (3) That at any time or from time to time, without liability therefor and without notice, upon written request of Beneficiary and presentation of this DEED OF TRUST and said note(s) for endorsement, and without affecting the personal liability of any person for payment of the indebtedness secured hereby, and upon payment of its fees, Trustee may: reconvey any part of said property, consent to the making of any map or plat thereof; join in granting any easement thereon; or join in any extension agreement or any agreement subordinating the lien or charge hereof.
- (4) That upon written request of Beneficiary stating that all sums secured hereby have been paid, and upon surrender of this DEED OF TRUST and said notes, to Trustee for cancellation and retention or other disposition as Trustee in its sole discretion may choose and upon payment of its fees, Trustee shall reconvey, without covenants or warranty, express or implied, the property then held hereunder. The recitals in such reconveyance of any matters or

facts shall be conclusive proof of the truthfulness thereof. The Grantee in such reconveyance may be described as "The Person or Persons Legally Entitled Thereto."

(5) That as additional security, Trustor hereby gives to and confers upon Beneficiary the right, power and authority during the continuance of this Trust, to collect the rents, issues and profits of said property, reserving unto Trustor the right, prior to any default by Trustor in payment of any indebtedness secured hereby or in performance of any agreement hereunder, to collect and retain such rents, issues and profits as they become due and payable. Upon any such default, Beneficiary may at any time without notice, either in person, by agent, or by a receiver to be appointed by a court, and without regard to the adequacy of any security for the indebtedness hereby secured, or the solvency of the Trustor, enter upon and take possession of said property or any part thereof, in his own name sue or otherwise collect such rents, issues and profits, including those past due and unpaid, and apply the same, less costs and expenses of operation and collection, including reasonable attorney's fees, upon any indebtedness secured hereby, and in such order as Beneficiary may determine. The entering upon and taking possession of said property, the collection of such rents, issues and profits and the application thereof as aforesaid, shall not cure or waive any default or notice of default hereunder or invalidate any action pursued to such notice.

(6) That upon default by Trustor in the payment of any indebtedness secured hereby or in performance of any agreement hereunder, Beneficiary may declare all sums secured hereby immediately due and payable by delivery to Trustee of written declaration of default and demand for sale and of written notice of default and election to cause to be sold said property, which notice Trustee shall cause to be filed for record. Beneficiary also shall deposit with Trustee this Deed, said note and all documents evidencing expenditures secured hereby.

After the lapse of such time as may then be required by law following the recording of said notice of default, and notice of sale having been given as then required by law, Trustee without demand on Trustor, shall sell said property at the time and place fixed by it in said notice of sale, either as a whole or in separate parcels, and in such order as it may determine, at public auction to the highest bidder for cash in lawful money of the United States, payable at time of sale. Trustee may postpone sale of all or any portion of said property by public announcement at such time and place of sale, and from time to time thereafter may postpone such sale by public announcement at the time fixed by the preceding postponement. Trustee shall deliver to such purchaser its deed conveying the property as sold, but without covenant or warranty, expressed or implied. The recitals in such deed of any matters or facts shall be conclusive proof of the truthfulness thereof. Any persons, including Trustor, Trustee or Beneficiary, as hereinafter defined, may purchase at such sale.

After deducting all costs, fees, and expenses of Trustee and of this Trust, including cost of evidence of title in connection with sale, Trustee shall apply the proceeds of sale in payment of: All sums expended under the terms hereof, not then repaid, with accrued interest at the amount allowed by law in effect at the date hereof; all other sums then secured hereby; and the remainder, if any, to the person or persons legally entitled thereto.

(7) Beneficiary, or any successor in ownership of any indebtedness secured hereby, may from time to time, by instrument in writing, substitute a successor or successors to any Trustee named herein or acting hereunder, which instrument, executed by the Beneficiary and duly acknowledged and recorded in the office of the recorder of the county or counties where said property is situated, shall be conclusive proof of proper substitution of such successor Trustee or Trustees, who shall, without conveyance from the predecessor Trustee, succeed to all its title, estate, rights, powers and duties. Said instrument must contain the name of the original Trustor, Trustee and Beneficiary hereunder, the book and page where this Deed is recorded and the name and address of the new Trustee.

(8) That this DEED OF TRUST applies to, inures to the benefit of, and binds all parties hereto, their heirs, legatees, devisees, administrators, executors, successors, and assigns. The term Beneficiary shall mean the owner and holder, including pledgees, of the note(s) secured hereby, whether or not named as Beneficiary herein. In this DEED OF TRUST, whenever the context so requires, the masculine gender includes the feminine and/or neuter, and the singular number includes the plural.

(9) The Trustee accepts this trust when this DEED OF TRUST, duly executed and acknowledged, is made public record as provided by law. Trustee is not obligated to notify any party hereto of pending sale under any other DEED OF TRUST or of any action or proceeding in which Trustor, Beneficiary, or Trustee shall be a party unless brought by Trustee.

This document was prepared by Richard K. Bloom, General Counsel, Baptist General Conference, 2002 S. Arlington Heights Road, Arlington Heights, Illinois 60005.

Re: Code Compliance Inspection @ 25906 Gading Rd

Dear Filipino Community Christian Church :

In 1989, the City adopted regulations establishing a mandatory code compliance inspection program for multi-family housing. The purpose of the program is to insure that dwelling units are safe and sanitary and comply with Housing Code Standards; to prevent the deterioration of the City's housing stock; and to help maintain stable and attractive neighborhoods. This program was modified in 1993 to also require inspection of all non-owner occupied rental single-family homes, condominiums, townhouses and duplexes.

Recently, the City revised the Residential Rental Inspection Program (RRIP) to focus on areas with the greatest concentration of rental housing. The seven areas selected for concentrated effort include: South Garden; Harder-Tennyson (Census Tract 4277); Harder-Tennyson (Census Tract 4375); South Hayward BART/Dixon Street; Burbank; and the Jackson Triangle. All rental units within these areas will be inspected approximately every three and one-half (3.5) years.

Rental properties outside of the focus area will be inspected through a random sampling of 10% of the units in a given census tract. Properties selected in these areas that passed inspection by the first progress check in the previous cycle will be subject only to a common area inspection unless violations are apparent, in which case all unit(s) will be inspected. Properties that do not meet the above criteria will receive a full inspection.

The fees and penalties for the RRIP have also been revised to reflect cost increases since the fees were last adjusted in 1993 and to encourage more speedy compliance with the codes. The new fee penalty schedule is:

- Fees for surveys and progress checks are \$150 per parcel and \$60 per unit. If no violations are identified, no fee is charged.

RE: CERTIFICATION OF CODE COMPLIANCE 25906 Gading Rd

Dear Filipino Community Christian Church :

Congratulations! I am pleased to inform you that the above property meets minimum Housing and Building Code Standards. The time and expenditures you have spent in improving your property will provide a safe and sanitary living environment for your tenant(s) and help maintain, if not improve, the neighborhood and encourage other property owners to do the same.

On behalf of the city, I want to thank you for your cooperation in this matter and for providing and maintaining housing for our citizens.

If I may be of further assistance, please feel free to call me at (510) 583-4163.

Cordially,

Jim Olson
Housing Inspector

NOTE: The granting of a Building Permit does not grant any right or privilege for (1). Erection of any building and/or structure on any portion thereof, upon any street, alley, or other public place or portion thereof, or (2). Use any building and/or structure on any portion thereof, for any purpose that is, or may be prohibited by ordinances of title to, or right of possession in, the property described in such Permit.

The granting of a Building Permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such Permit.

I hereby certify and I agree, if a permit is issued, that all the provisions of the BUILDING LAW, THE BUILDING ZONE ORDINANCES, SET-BACK LINE REQUIREMENTS AND THE FIRE ORDINANCES OF THE CITY OF HAYWARD and the STATE HOUSING ACT OF CALIFORNIA will be complied with whether herein specified or not; and I hereby agree to save, indemnify and hold harmless the City of Hayward against all liabilities, judgments, costs and expenses which may in any wise accrue against said city in consequence of the granting of this permit, or from the use or occupancy of any sidewalk, street or sub-sidewalk placed by virtue thereof, and will in all things strictly comply with the conditions of this permit.

I have read the above application and know the contents thereof; the same is true and correct. I further state that I am familiar with the laws governing building within the City of Hayward, and State of California and amendments thereto, and that the above building and/or structure will be built in conformity therewith.

RE: Job Address: 25906 Gading Rd.
Permits: E55684

The above-referenced permit(s) for subject property have not had the required City inspections within the last 180 days. Section 303(d) of the Hayward Building Code states:

"(d) Expiration. Every permit issued by the Building Official under the provisions of this Code shall expire by limitation and become null and void, if the building or work authorized by such permit is not commenced within 180 days from the date of such permit, or if the building or work authorized by such permit is suspended or abandoned at any time after the work is commenced for a period of 180 days. Before such work can be recommenced a new permit shall be first obtained so to do, and the fee therefor shall be one-half the amount required for a new permit for such work, provided no changes have been made or will be made in the original plans and specifications for such work; and provided, further, that such suspension or abandonment has not exceeded one year."

Please contact this office at 784-8675 to schedule the necessary inspection(s). If we do not hear from you within ten (10) days of the date of this letter, the above-referenced permit(s) will be cancelled and no additional contact will be had by this office. Any unfinished portion of work or completed work that has not been properly inspected will require additional permits and inspections.

If you have any questions, please contact this office. The inspectors can be reached between 3:00 p.m. and 4:00 p.m., Monday through Friday.

Sincerely,

Robert Walsh
Sr. Electrical Inspector

Re: 25906 Gading Road

Dear Mr. Wilson:

NOTICE AND ORDER

It has been brought to our attention that the dwelling located at 25906 Gading Road is not equipped with any running water.

The Uniform Building Code, Section 1205 (d) Sanitation, requires that every dwelling unit be provided with hot and cold running water. This is in violation of the Hayward Municipal Code, Chapter 9, Article 3, Section 9-3.302 #14. The structure is therefore substandard and inhabitable.

This is a "Notice and Order" for you to either vacate the unit and properly secure it or obtain the proper permits and inspections in order to provide running water to the unit. Compliance with this notice must be done within fifteen (15) days of receipt of this letter.

If you have any questions, please call me at 293-5254.

Sincerely,

Carlos Baltodano
Building Official

PS Form 3800, June 1980 (Reverse)

CITY OF HAYWARD
DEPARTMENT OF COMMUNITY AND ECONOMIC DEVELOPMENT
Building Inspection Division

June 23, 1993

TO: Director of Community & Economic Development
FROM: Assistant Building Official 
SUBJECT: 25906 Gading Road

On Saturday, June 12, 1993, the Assistant Building Official responded to a call from the Hayward Police Department Emergency Response Unit to view an accident site at the above address for hazardous code violations.

Upon arrival, I found that a young boy had been electrocuted by touching wires supplying power to a deep well pump located on the rear portion of the property. The wires were #12 copper and in the main were bare, as the insulation had rotted and fallen off. Due to improper support poles, the wires had drooped to less than 4' from the ground in the area of the accident.

Pacific Gas & Electric cut the wires (2) off at their exposed source under the eaves of the garage/storage structure located near the front of the site. Testing revealed them to be carrying 240 volts at 40 amps. No ground wire was supplied.

The power source structure was in an abandoned condition in that the windows were broken out though partially blocked by stored items. At the rear were a great amount of rotting garbage and auto parts.

On Monday morning, June 21, 1993, the Assistant Building Official, the Senior Building Inspector/Structural, and the Senior Building Inspector/Electrical, met Hayward Police Officer David Sant in an attempt to gain access into the garage structure. We were unable to locate either of the owners, Mr. Wm. M. Wilson, Jr. or Jean Wilson, brother and sister. An unidentified man who answered the police officer's knock claimed he did not know where they might be working.

Community Preservation was contacted and requested to visit the site in order to facilitate cleaning up the garbage.

This structure should be posted for repair or demolition under the abatement process.

Attached are the notes of the Senior Inspectors and a sketch giving the lot layout. If you have any questions, please call.

Director of Community & Economic Development

Notes from Larry Hulse, Sr. Building Inspector/Structural

On June 21, 1993, at 9:30 am, Emmett Forseth, Assistant Building Official, Bob Walsh, Sr. Electrical Inspector, and Larry Hulse, Sr. Building Inspector/Structural met with David Sant of the Hayward Police Department at the above site. The purpose of this meeting was to perform field observations and how they related to Police Report #93-16238.

Upon arrival at the above site, we observed the following:

1. The electrical overhead service to a well pump located at the rear of the property was disconnected and the only wiring suspended between power poles existed between poles #(g) & (h), see attached diagram.
2. Said wires are approximately 7'4" from grade.
3. The origin of the electrical supply started at the detached garage, "c" on attached diagram.
4. The conductors had been disconnected from their supply and now lay on the ground.
5. There were no overhead wires noted on this date between pole "e", "f" or "g" on attached diagram.
6. The wiring observed on the ground in these areas appeared to have lost its insulation over the years because of exposure to the elements. Someone had partially installed electrical tape over the exposed conductors in the past. It is unknown when this took place.

Upon return to the office, I researched the files on the property. Our records indicate the following:

- 6-21-93 Legal owners listed as of this date are Will M. Jr. & Jean Wilson - 25906 Gading Road, Hayward, CA.
- 10-22-87 William Wilson applied for an electrical permit (#55684) for one receptacle, voltage unknown.
- 10-22-87 through
2-4-90 Mr. Wilson never requested any inspections.
- 2-5-90 Mr. Wilson was sent a notice of pending cancellation of the permit because there were no inspections within the required time frame.

Director of Community & Economic Development
June 23, 1993
Page Three

2-22-90 Mr. Wilson did not respond to the notice sent on 2-5-90,
therefore the electrical permit (#55684) was cancelled.

There are no records beyond this point listed in the Building
Inspection Division office, however Community Preservation has
records as late as 5-7-93.

Site Information (See attached diagram)

Code for diagram

a= single family dwelling
b= detached storage shed #1
c= detached garage
d= detached storage shed #2
e= power pole #1
f= power pole #2
g= power pole #3
h= power pole #4
i= well pump (230 volt 6.2 AMP min 8.1 AMP max)

Director of Community & Economic Development

Page Four

Notes from Bob Walsh, Sr. Electrical Inspector

I was assigned to inspect an overhead branch circuit feeding a one horsepower pump, 230 volt, single phase motor, in a field behind the above referenced address. No. 12 AWG copper conductors were spanned from the garage structure over three poles for approximately 320 feet. The last 85 feet of span remained clearing the ground by approximately 7 feet. The conductor's insulation had completely deteriorated over approximately 95 percent of the lengths. At one time, thermoplastic electrical insulating tape was wrapped around various areas of the conductor's lengths. However, the remaining tape had deteriorated to the point of unraveling and hanging on the conductors. The disconnect fan for the pump motion was corroded and locked in the closed (energized) position. Armored cable was installed between the disconnect and the pump motion without protection from the elements. The motor was protected from overload by a 30 amp and a 25 amp fuse.

I was unable to trace the supply conductor to the distribution panel board because the interiors of the dwelling and associated structures were not accessible.

Memo

To: Curtis Martynell
From: Elizabeth Humen
Re: 25906 Admng La

Captain Mike Jay, Hayward Fire Dept, Station 1, requests that the house + garage at 25906 Admng be secured with steel in the boards. The nails have been removed by vagrants.

Curtis can do this anymore.

25906 Gading Rd.

Attention: Jim Arhontes

February 7, 1994

Garage

9'4" x 7'2" large garage door
3 sheets @ 4'2" x 4'3" windows
3'6" x 7' rear entry door

House

The following dimensions are taken starting from the back door and moving around the house counterclockwise.

3'9" x 7'6" rear entry door
3'5" x 3'6"
7' x 4'5" rear Living room window
3'5" x 3'6" rear bathroom window
7' x 4'5" rear corner bedroom window
2 sheets @ 4'5" x 4'6" bedroom windows at the left side of the building
5 sheets @ 4'7" x 3'2" along the front of building and one window at the front right side
4' x 7'8" main entry at the front of the building
Please include three (3) additional sheets of plywood for a couple other windows that were not accessible for measuring.

Use 1/2" plywood with 16D nails for boarding over the openings.

I have tentatively scheduled Thursday February 17, for the day to board over the structure. At least one Police Officer will be at the site during the work.

Please wait until I give the go ahead for buying the materials as I am currently working together with the owners attorney.

If you have questions, please call me at 293-5443

Re: 25906 Gading Road

Dear Mr. Wilson:

NOTICE AND ORDER

It has been brought to our attention that the dwelling located at 25906 Gading is not equipped with any running water.

The Uniform Building Code, Section 1205.1 Sanitation, requires that every dwelling unit be provided with hot and cold running water. This is in violation of the Hayward Municipal Code, Chapter 9, Article 3, Section 9-3.302 #14. The structure is therefore substandard and inhabitable.

This is a "Notice and Order" for you to either vacate the unit and properly secure it or obtain the proper permits and inspections in order to provide running water to the unit. Compliance with this notice must be done within ten (10) days of receipt of this letter.

If you have any questions, please call me at 293-5254.

Sincerely,

Carlos Baltodano
City Building Official

Contact: Rob Campbell

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GeoSolve were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

GeoSolve (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of GeoSolve on Aug 17, 2015.

TARGET PROPERTY

25906 Gading Road
Hayward, CA 94544

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.**

Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

EXECUTIVE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|--|---|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 20 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 7.3 Min: 6.1 |
| 2 | 20 inches | 53 inches | silty clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay. Soils. | Max: 1.4 Min: 0.42 | Max: 7.3 Min: 6.1 |
| 3 | 53 inches | 79 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 8.4 Min: 6.6 |

Soil Map ID: 2

Soil Component Name: Botella

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

EXECUTIVE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|--|---|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 9 inches | loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 14 Min: 4 | Max: 7.8 Min: 6.6 |
| 2 | 9 inches | 33 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 7.8 Min: 6.6 |
| 3 | 33 inches | 59 inches | silt loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |

Soil Map ID: 3

Soil Component Name: Clear Lake

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Last EDR Contact :05/29/2015

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW[®] Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW[®] Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1

EXECUTIVE SUMMARY

RCRA-SQG site within approximately 0.25 miles of the target property.

| S & G PRESS INC | 25377 HUNTWOOD AVE | N 1/8 - 1/4 (0.139 mi.) | 4 | 10 |

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/04/2015 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 06/15/2015 has revealed that there are 8 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 5 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

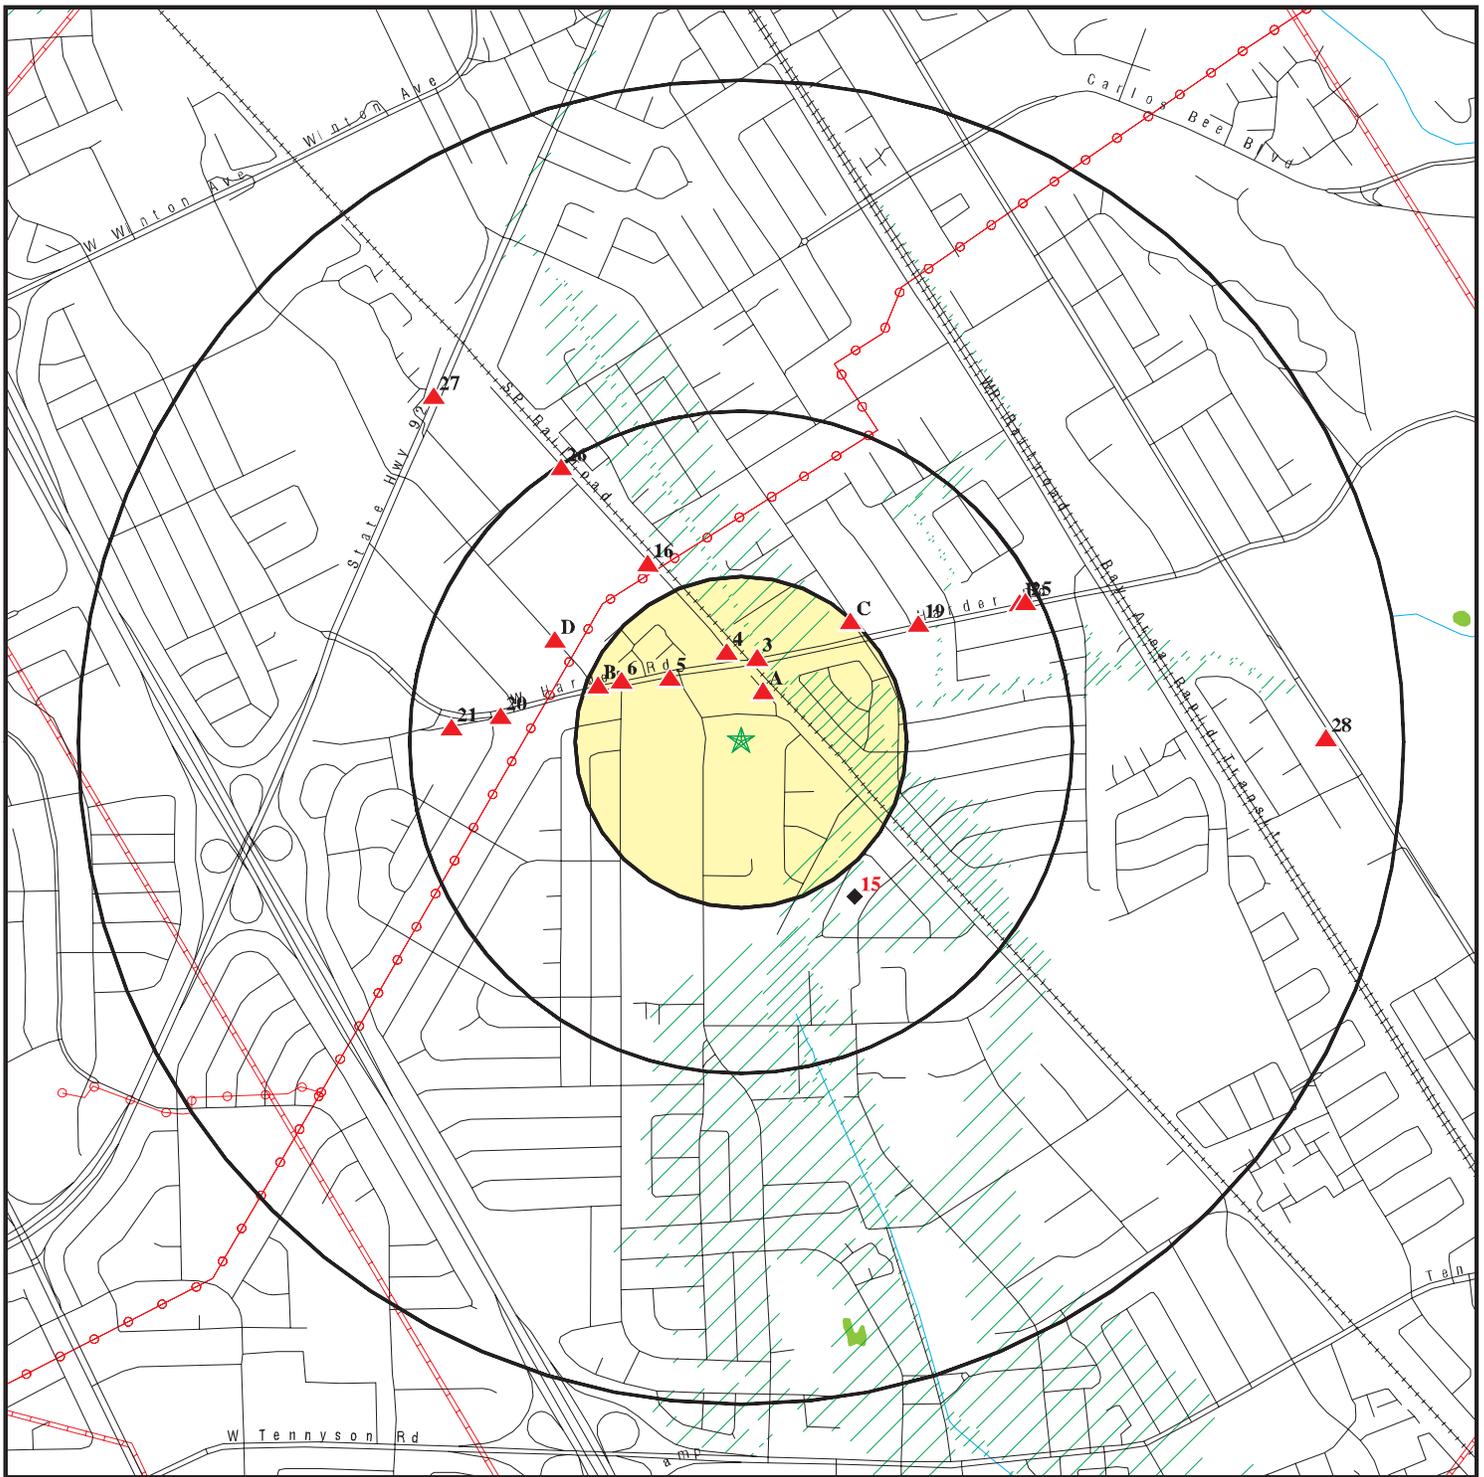

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

USGS TOPOGRAPHIC MAP

| | |
|----------------------|---------------------|
| Target Property Map: | 5640616 HAYWARD, CA |
| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

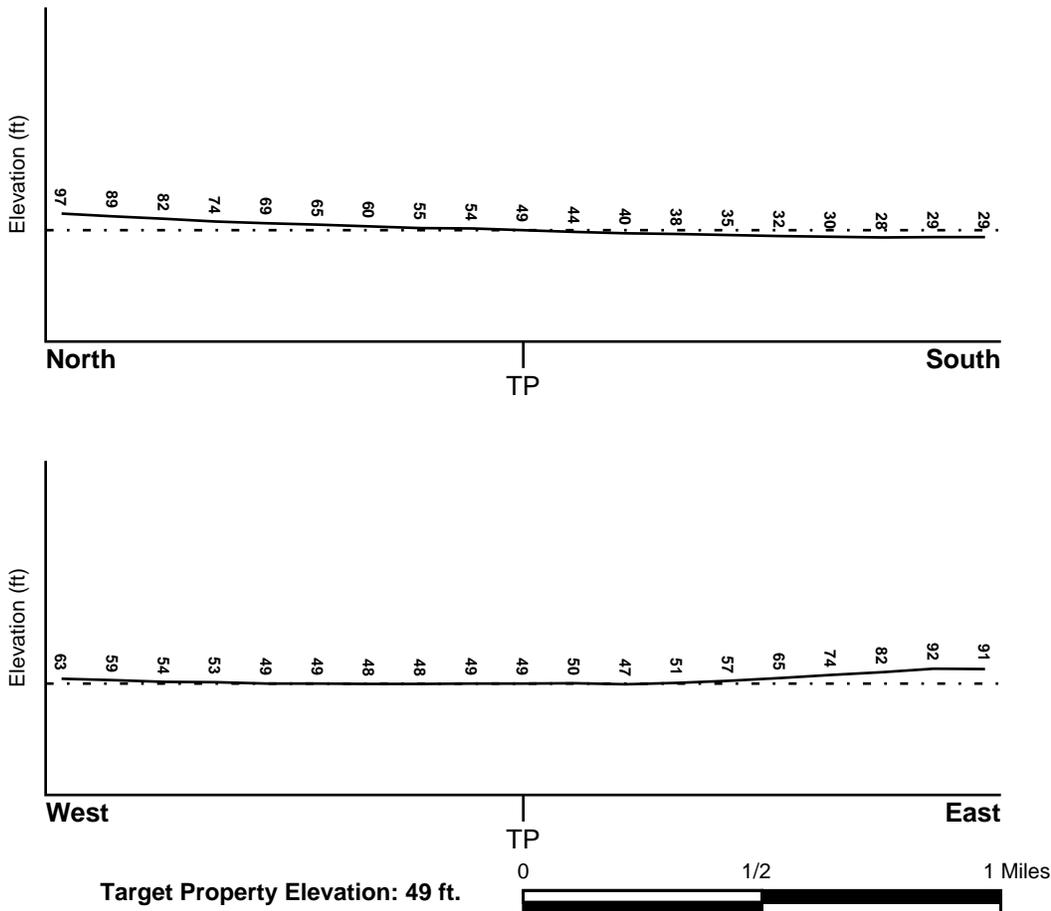

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|--|--|
| <u>Target Property County</u> ALAMEDA, CA | FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map |
|--|--|

NATIONAL WETLAND INVENTORY

| | |
|---|--|
| <u>NWI Quad at Target Property</u> HAYWARD | NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map |
|---|--|

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

| | |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| I19 | 1/2 - 1 Mile NNE | Not Reported |
| I22 | 1/2 - 1 Mile NW | NW |
| I23 | 1/2 - 1 Mile NW | NW |

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|--|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 20 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 7.3 Min: 6.1 |
| 2 | 20 inches | 53 inches | silty clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay. | Max: 1.4 Min: 0.42 | Max: 7.3 Min: 6.1 |
| 3 | 53 inches | 79 inches | silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils. | Max: 4 Min: 1.4 | Max: 8.4 Min: 6.6 |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Botella

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|---|---|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 9 inches | loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 14 Min: 4 | Max: 7.8 Min: 6.6 |
| 2 | 9 inches | 33 inches | clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 7.8 Min: 6.6 |
| 3 | 33 inches | 59 inches | silt loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 4 Min: 1.4 | Max: 8.4 Min: 7.4 |

Soil Map ID: 3

Soil Component Name: Clear Lake

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

"When Quality Counts"

Analytical Report

WorkOrder: 1508626

Report Created for: Geosolve, Inc.

1807 Santa Rita Road, Suite D-165
Pleasanton, CA 94566

Project Contact: Rob Campbell

Project P.O.: 2015-19

Project Name: 2015-19; Gading Rd.

Project Received: 08/18/2015

Analytical Report reviewed & approved for release on 08/25/2015 by:

Angela Rydelius,
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Geosolve, Inc.
Project: 2015-19; Gading Rd.
WorkOrder: 1508626

Glossary Abbreviation

| | |
|--------------|--|
| 95% Interval | 95% Confident Interval |
| DF | Dilution Factor |
| DI WET | (DISTLC) Waste Extraction Test using DI water |
| DISS | Dissolved (direct analysis of 0.45 µm filtered and acidified water sample) |
| DUP | Duplicate |
| EDL | Estimated Detection Limit |
| ITEF | International Toxicity Equivalence Factor |
| LCS | Laboratory Control Sample |
| MB | Method Blank |
| MB % Rec | % Recovery of Surrogate in Method Blank, if applicable |
| MDL | Method Detection Limit |
| ML | Minimum Level of Quantitation |
| MS | Matrix Spike |
| MSD | Matrix Spike Duplicate |
| N/A | Not Applicable |
| ND | Not detected at or above the indicated MDL or RL |
| NR | Data Not Reported due to matrix interference or insufficient sample amount. |
| PF | Prep Factor |
| RD | Relative Difference |
| RL | Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.) |
| RPD | Relative Percent Deviation |
| RRT | Relative Retention Time |
| SPK Val | Spike Value |
| SPKRef Val | Spike Reference Value |
| SPLP | Synthetic Precipitation Leachate Procedure |
| TCLP | Toxicity Characteristic Leachate Procedure |
| TEQ | Toxicity Equivalents |
| WET (STLC) | Waste Extraction Test (Soluble Threshold Limit Concentration) |

Analytical Qualifiers

a3 sample diluted due to high organic content.

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).
 - MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

Chain of Custody (COC) Information

Chain of custody present? Yes No
 Chain of custody signed when relinquished and received? Yes No
 Chain of custody agrees with sample labels? Yes No
 Sample IDs noted by Client on COC? Yes No
 Date and Time of collection noted by Client on COC? Yes No
 Sampler's name noted on COC? Yes No

Sample Receipt Information

Custody seals intact on shipping container/cooler? Yes No NA
 Shipping container/cooler in good condition? Yes No
 Samples in proper containers/bottles? Yes No
 Sample containers intact? Yes No
 Sufficient sample volume for indicated test? Yes No

Sample Preservation and Hold Time (HT) Information

All samples received within holding time? Yes No
 Sample/Temp Blank temperature Temp: 3°C NA
 Water - VOA vials have zero headspace / no bubbles? Yes No NA
 Sample labels checked for correct preservation? Yes No
 pH acceptable upon receipt (Metal: <2; 522: <4; 218.7: >8)? Yes No NA
 Samples Received on Ice? Yes No

(Ice Type: WET ICE)

UCMR3 Samples:

Total Chlorine tested and acceptable upon receipt for EPA 522? Yes No NA
 Free Chlorine tested and acceptable upon receipt for EPA 218.7, 300.1, 537, 539? Yes No NA

* NOTE: If the "No" box is checked, see comments below.
